

MAKE SENSE OF SHOOTING MODES

The mode you choose affects the amount of control you have over camera settings

Auto mode

If you're a complete novice, this mode is ideal because the camera takes care of all the settings automatically.

Auto Flash Off mode

The same as Auto, but for museums, theatres or indoor sports venues where using a flash might get you thrown out!

Portrait mode

The camera softens skin tones and uses a wide aperture to throw the background out of focus.

Landscape mode

Designed for vivid landscape shots taken in daylight. The built-in flash is switched off and you might need a tripod in poor light.

Child mode

In this mode, the camera makes backgrounds and clothing colourful but keeps skin tones soft and natural looking.

Sports mode

The flash is switched off and the camera uses faster shutter speeds to help freeze fast-moving subjects.

Close-up mode

This favours a smaller aperture to improve depth of field. Consider using a tripod when there's a risk of camera-shake.

Night Portrait mode

The flash fires to light your subject, but the camera uses a slower shutter speed to capture the background lighting too.

Manual mode

This is designed for experts. You choose the shutter speed and aperture yourself, though the camera still suggests settings.

Aperture Priority

Use this if you want to choose the aperture yourself. The camera will set the shutter speed automatically for correct exposure.

Shutter Priority

Use this if you want to choose the shutter speed yourself. The camera will set the aperture automatically so that the exposure is correct.

Program AE mode

Ideal for general use, or when there's little time to think. The camera sets the shutter speed and aperture but you get to control other settings.

GUIDE

A special feature on the D3000 that shows you what to do as you're taking pictures. It's a great way for beginners to learn about photography.
