

### Phase - I: OBJECTIVE TYPE TEST (ONLINE EXAMINATION)

The time for the test is 130 minutes; however you may have to be at the venue for approximately 180 minutes including the time required for logging in, collection of the Admission letters, giving of instructions etc. The tests will be provided in English and Hindi. You can attempt any question from 1 to 200 at any point of time within these 130 minutes. All the questions will have multiple choices. Out of the five answers to a question only one will be the correct answer. You have to select the most appropriate answer and 'mouse click' that alternative which you feel is appropriate/ correct. The alternative/option that you have clicked on will be highlighted and will be treated as your answer to that question. There will be penalty for wrong answers marked by you. For every wrong answer marked by you, 1/4th of the marks assigned to that question will be deducted as penalty.

Please note that the types of questions in this handout are only illustrative and not exhaustive. In the actual examination you will find questions of a higher difficulty level on some or all of these types and also questions on the types not mentioned here.

Some sample questions are given below.

web a titration experiment can be carried out to accurately measure the volume of substances that react in chemical reactions this technique is commonly used in neutralisation reactions and can also

titration curves equivalence point article khan academy - Feb 15 2023

web titrant and analyte is a pair of acid and base acid base titrations are monitored by the change of ph as titration progresses let us be clear about some terminologies before we get into the discussion of titration curves titrant solution of a known concentration which is added to another solution whose concentration has to be determined

*17 3 acid base titrations chemistry libretexts* - Aug 21 2023

web there are two basic types of acid base titrations indicator and potentiometric in an indicator based titration you add another chemical that changes color at the ph equal to the equivalence point when the acid and base are in stoichiometric proportions

*acid base titrations chemistry libretexts* - Sep 22 2023

web acid base titrations are usually used to find the amount of a known acidic or basic substance through acid base reactions the analyte titrand is the solution with an unknown molarity the reagent titrant is the solution with a known molarity that will react with the analyte

**acid base titration wikipedia** - Mar 16 2023
