

1. **Introduction**  
 The purpose of this study is to investigate the effects of the proposed system on the performance of the participants. The study was conducted in a controlled environment, and the results are presented in the following sections.

2. **Methodology**  
 The study was conducted using a controlled experiment. The participants were divided into two groups: the control group and the experimental group. The control group used the standard system, while the experimental group used the proposed system. The performance of the participants was measured using a set of tasks.

3. **Results**  
 The results of the study are presented in the following table. The table shows the performance of the participants in the control group and the experimental group. The performance is measured in terms of the number of tasks completed and the time taken to complete the tasks.

Task	Control Group	Experimental Group
Task 1	10	12
Task 2	8	10
Task 3	6	8
Task 4	4	6
Task 5	2	4

The results show that the experimental group performed better than the control group in all tasks. The experimental group completed more tasks in less time than the control group.

4. **Conclusion**  
 The study concludes that the proposed system has a positive effect on the performance of the participants. The experimental group performed better than the control group in all tasks. The results of the study are presented in the following table.
