Patriots Or Traitors A History Of American Educated Chinese Students:

"Patriots" Or "traitors"? Stacey Bieler, 2004 Focusing on the significant but often unacknowledged impact American trained Chinese students have played in China during the 20th century historian Bieler investigates what price China has paid in terms of technological and economic development and social cohesion by choosing the revolutionary path and rejecting these liberal change agents and what role US pride and policies have played in undermining its own goal of transferring American values to China and building mutual friendship between the two countries Annotation 2004 Book News Inc Portland OR booknews.com *Self-Identity Narratives of Chinese Students in the United States* Sarah Y.

Köksal, 2023-01-31 While previous research has explored the academic adaptation or acculturation processes of Chinese students studying abroad limited attention has been paid to students own perspectives and narrations of their experience To contribute to a more nuanced understanding of this highly mobile group this study takes a closer look at the students self identity narratives How do they make sense of their foreign adventure How do they position themselves among their peers and their family members as well as within the greater transnational context Based on 29 in depth biographical interviews with Chinese students in the United States the findings show the participants continuously interpreting and revising their individual academic and cultural identities In the familial context a recurring narrative of the high potential only child could be observed Many students and their family members felt that their unique talents and personalities were not appreciated within the Chinese educational system and thus sought more holistic environments abroad **Knowledge, Power, and**

Networks Cécile Armand, Christian Henriot, Huei-min Sun, 2022-09-12 In the past decades the world has watched the rise of China as an economic and military power and the emergence of Chinese transnational elites What may seem like an entirely new phenomenon marks the revival of a trend initiated at the end of the Qing The redistribution of power wealth and knowledge among the newly formed elites matured during the Republican period This volume demonstrates both the difficulty and the value of re thinking the elites in modern China It establishes that the study of the dynamic tensions within the elite and among elite groups in this epochal era is within reach if we are prepared to embrace forms of historical inquiry that integrate the abundant and even limitless historical resources and to engage with the rich repertoire of digital techniques instruments available and question our previous research paradigms This renewed approach brings historical research closer to an integrative data rich history of modern China *Pacific America* Lon Kurashige, 2017-07-31 In recent

times the Asia Pacific region has far surpassed Europe in terms of reciprocal trade with the United States and since the 1980s immigrants from Asia entering the United States have exceeded their counterparts from Europe reversing a longstanding historical trend and making Asian Americans the country's fastest growing racial group What does transpacific history look like if the arc of the story is extended to the present The essays in this volume offer answers to this question challenging current assumptions about transpacific relations Many of these assumptions are expressed through fear that the

ascendancy of China threatens a U S led world system and undermines domestic economies that immigrants subvert national unity and that globalization for all its transcending of international cultural and racial differences generates its own forms of prejudice and social divisions that reproduce global and national inequalities The contributors make clear that these fears associated with and induced by pacific integration are not new Rather they are the most recent manifestation of international racial and cultural conflicts that have driven transpacific relations in its premodern and especially modern iterations Pacific America differs from other books that are beginning to flesh out the transnational history of the Pacific Ocean in that it is more self consciously a people s history While diplomatic and economic relations are addressed the chapters are particularly concerned with histories from the bottom up including attention to social relations and processes individual and group agency racial and cultural perception and collective memory These perspectives are embodied in the four sections focusing on China and the early modern world circuits of migration and trade racism and imperialism and the significance of Pacific islands The last section on Pacific Islanders avoids a common failing in popular perception that focuses on both sides of the Pacific Ocean while overlooking the many islands in between The chapters in this section take on one of the key challenges for transpacific history in connecting the migration and imperial histories of the United States Japan China Korea Vietnam and other nations with the history of Oceania

Political Theology in Chinese Society Joshua Mauldin, 2024-06-03 This book provides an itinerary for studying political theology in Chinese society including mainland China Hong Kong and Taiwan It explores the changing role of religion in Chinese history from the rise of Buddhism alongside Confucianism and Daoism through the arrival of Christianity and Islam to the suppression of religion under communism Since the reform and opening period beginning in 1978 China has experienced a resurgence of religiosity with powerful societal implications Governing authorities have sought to regulate religious practice in line with their governing system Political theology in Chinese society is very much in flux and the chapters in this volume provide an array of windows through which to view the evolving reality They include historical approaches and descriptive analyses with an interdisciplinary and international range of perspectives

by contributors based in and outside China The book will be of particular interest to scholars of theology religious studies and contemporary China studies **Salt and Light, Volume 3** Carol Lee Hamrin, Stacey Bieler, 2011-07-15 In this centennial year of China's 1911 Revolution Volume 3 in the Salt and Light series includes the life stories of influential Chinese who played a political or military role in the new Republic that emerged Recovering this precious legacy of faith in action shows the deep roots of the revival of Christian faith in China today *Asian Migrations* Tony Fielding, 2015-07-16 This textbook describes and explains the complex reality of contemporary internal and international migrations in East Asia Taking an interdisciplinary approach Tony Fielding combines theoretical debate and detailed empirical analysis to provide students with an understanding of the causes and consequences of the many types of contemporary migration flows in the region Key features of *Asian Migrations* Comprehensive coverage of all forms of migration including labour migration student migration marriage migration displacement and human trafficking Text boxes containing key concepts and theories More than 30 maps and diagrams Equal attention devoted to broad structures e.g. political economy and individual agency e.g. migration behaviours Emphasis on the conceptual and empirical connections between internal and international migrations Exploration of the policy implications of the trends and processes discussed Written by an experienced scholar and teacher of migration studies this is an essential text for courses on East Asian migrations and mobility and important reading for courses on international migration and Asian societies more generally **Out of China** Robert Bickers, 2017-03-30 SHORTLISTED FOR THE 2018 WOLFSON HISTORY PRIZE The extraordinary and essential story of how China became the powerful country it is today Even at the high noon of Europe's empires China managed to be one of the handful of countries not to succumb Invaded humiliated and looted China nonetheless kept its sovereignty Robert Bickers' major new book is the first to describe fully what has proved to be one of the modern era's most important stories the long often agonising process by which the Chinese had by the end of the 20th century regained control of their own country *Out of China* uses a brilliant array of unusual strange and vivid sources to recreate a now fantastically remote world the corrupt lurid modernity of pre War Shanghai the often tiny patches of extra territorial land controlled by European powers one of which unnoticed had mostly toppled into a river the entrepôts of Hong Kong and Macao and the myriad means through armed threats technology and legal chicanery by which China was kept subservient Today Chinese nationalism stays firmly rooted in memories of its degraded past the quest for self sufficiency a determination both to assert China's standing in the world and its outstanding territorial claims and never to be vulnerable to renewed attack History matters deeply to Beijing's current rulers and *Out of China* explains why **The Harvard-Yenching Institute and Cultural Engineering** Shuhua Fan, 2014-08-21 Through an empirical multi archival study of a transnational foundation the Harvard Yenching Institute HYI from the 1920s to the early 1950s this book presents the story of transplanting Western American humanities scholarship into Asia China and addresses central questions in U S China relations This book focuses on the HYI's programs in teaching research and publication of

Chinese humanities within China to the early 1950s and to a lesser extent its activities at Harvard that had close ties with its China side Through the HYI story the author examines in depth the cooperation tensions adaptation and integration in the operation management and governance of the HYI s programs on both sides of the Pacific and the complex multi layered interactions between American educators and their Chinese partners treating each side sympathetically but without losing sight of the big picture As the first comprehensive study on the subject the book adopts a concept of cultural engineering which is defined as a conscious design to use cultural heritage to recreate culture in order to promote a society s development to look at key issues in a way which accounts for interactions and initiatives on both sides and shows the difficult path toward developing common interests without neglecting tensions and conflicts thus going beyond the various one sided historiographies which pit Chinese against Americans or nativist rejection of modernity against cultural imperialism The HYI experience in China from the 1920s to the early 1950s resonates down to the present day in American relations with the world The United States faces many similar challenges in the Middle East Asia Africa and Latin America today as in revolutionary China of the 1920s to 1950s Therefore this study offers a window onto many issues relating to cross cultural interactions today especially between the United States and non Western nations
