Develop Your Own Rock Cycle Worksheet **Answer Key**

The rock cycle is the idea that the three main types of rock (sedimentary, metamorphic and igneous) undergo physical changes enabling each to change into any of the others. In other words, sedimentary can become metamorphic and/or igneous. Igneous can become sedimentary and/or metamorphic, and so forth.

The bullets below provide information on how each type of rock is formed.

- Any type of rock that undergoes heat and/or pressure can become *metamorphic* rock.
- Any type of rock that undergoes weathering and erosion turns into **sediment**.
- Any **sediment** that compacts or cements together can become *sedimentary* rock.
- *Igneous* rock is formed from cooling **magma**.
- **Magma** is formed from melting of *sedimentary*, *igneous* and *metamorphic* rock.

Using the above information, draw your own diagram to model the rock cycle. Your model should have five main categories – one for each of the types of rock and one for each of the intermediate stages (sediment and magma). **Below is an example of the rock cycle. Forms of solutions may vary, but content should be the same.**

Discovering Science Through Inquiry: Earth Systems and Cycles Kit Kathleen Kopp, 2010-07-14 The Discovering Science through Inquiry series provides teachers and students of grades 3-8 with direction for hands-on science exploration around particular science topics and focuses. The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Earth Systems and Cycles kit provides a complete inquiry model to explore Earth's various systems and cycles through supported investigation. Guide students as they make cookies to examine how the rock cycle uses heat to form rocks. Earth Systems and Cycles kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students and video clips to support both students and teachers.

Differentiating Instruction with Menus Laurie E. Westphal, 2007 Differentiating Instruction With Menus offers teachers everything they need to create a student-centered learning environment based on choice. Addressing the four main subject areas: language arts, math, science, and social studies, and the major concepts taught within these areas, these books provide a number of different types of menus that elementary-aged students can use to select exciting products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format. Each book contains attractive reproducible menus, each based on the levels of Bloom's revised taxonomy for students to use to guide them in making decisions as to which products they will develop after studying a major concept or unit. Using creative and challenging choices found in Tic Tac Toe Menus, List Menus, 2-5-8 Menus, Baseball Menus, and Game Show Menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products, and teacher introduction pages for each menu. This book includes menus that teach students about physical science, earth science, and scientists and the tools they use.
