This successful title previously known as Building the 21st Century Home and now in its second edition explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban

neighbourhood as a model for rebuilding urban areas The book reviews the way that planning policies architectural trends

and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much

post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia

Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures

The authors suggest that these trends point to a very different urban future The authors argue that we must reform our

towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban

Neighbourhood is a model for such reform and the book describes what this would look like and how it might be brought

Banerjee,2021-10-07 This open access publication examines the impact of connected and automated vehicles on the

European city and the conditions that can enable this technology to make a positive contribution to urban development The

authors argue for two theses that have thus far received little attention in scientific discourse as connected and automated

vehicles will not be ready for use in all parts of the city for a long time previously assumed effects from traffic safety to traffic

performance as well as spatial effects will need to be re evaluated To ensure this technology has a positive impact on the

mobility of the future transport and settlement policy regulations must be adapted and further developed Established

territorial institutional and organizational boundaries must be investigated and challenged quickly Despite or indeed because

of the many uncertainties we find ourselves at the beginning of a new design phase not only in terms of technology development but also regarding politics urban planning administration and civil society
