Conservation Education and Outreach Techniques Susan Kay Jacobson,Mallory D. McDuff,Martha C. Monroe,2015 The conservation of biological diversity depends on people's knowledge and actions This book presents the theory and practice for creating effective education and outreach programmes for conservation The authors describe an exciting array of techniques for enhancing school resources marketing environmental messages using social media developing partnerships for conservation and designing on site programmes for parks and community centres Vivid case studies from around the world illustrate techniques and describe planning implementation and evaluation procedures enabling readers to implement their own new ideas effectively *Conservation Education and Outreach Techniques* now in its second edition and updated throughout includes twelve chapters illustrated with numerous photographs showing education and outreach programmes in action each incorporating an extensive bibliography Helpful text boxes provide practical tips guidelines and recommendations for further exploration of the chapter topics This book will be particularly relevant to conservation scientists resource managers environmental educators students and citizen activists It will also serve as a handy reference and a comprehensive text for a variety of natural resource and environmental professionals *Food and Cooking Skills Education* Anita Tull,2018-01-29 *Food and Cooking Skills Education* FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical

cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society *The Christian Advocate* ,1903

Cincinnati Magazine ,2005-04 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region The Importance of Being Little Erika Christakis,2016-02-09 Christakis expertly weaves academic research personal experience and anecdotal evidence into her book a bracing and convincing case that early education has reached a point of crisis her book is a rare thing a serious work of research that also happens to be well written and personal engaging and important Washington Post What kids need from grown ups but aren t getting an impassioned plea for educators and parents to put down the worksheets and flash cards ditch the tired craft projects yes you Thanksgiving Handprint Turkey and exotic vocabulary lessons and double down on one simple word play NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child s eye view of the learning environment To a four year old watching bulldozers at a construction site or chasing butterflies in flight the world is awash with promise Little children come into the world hardwired to learn in virtually any setting and about any matter Yet in today s preschool and kindergarten classrooms learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child s intelligence while overtaxing the child s growing brain These mismatched expectations wreak havoc on the family parents fear that if they choose the wrong program their child won t get into the right college But Yale early childhood expert Erika Christakis says our fears are wildly misplaced Our anxiety about preparing and safeguarding our children s future seems to have reached a fever pitch at a time when ironically science gives us more certainty than ever before that young children are exceptionally strong thinkers In her pathbreaking book Christakis explains what it s like to be a young child in America today in a world designed by and for adults where we have confused schooling with learning She offers real life solutions to real life issues with nuance and direction that takes us far beyond the usual prescriptions for fewer tests more play She looks at children s use of language their artistic expressions the way their imaginations grow and how they build deep emotional bonds to stretch the boundaries of their small worlds Rather than clutter their worlds with more and more stuff sometimes the wisest course for us is to learn how to get out of their way Christakis s message is energizing and reassuring young children are inherently powerful and they and their parents will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood revealing a place that s rich with possibility **Liberating Leadership Capacity** Linda Lambert,Diane P. Zimmerman,Mary E. Gardner,2016 During the past quarter century conceptions of leadership have evolved in concert with breakthrough

discoveries in science and generative learning Liberating Leadership Capacity captures these new ideas through the integration of the authors earlier works in constructivist leadership and leadership capacity What emerges is a pathway through which educators can become the primary designers of their own learning and that of their students thus creating sustainable systems of high leadership capacity This vision of leadership reframes professional learning designs and knowledge creation describing how these ideas are richly manifested in local national and international programs The context is democratic communities the learning is constructivist the leadership is shared The result is wise schools organizations and societies Liberating Leadership Capacity speaks to all adult learners who are engaged in educational improvement Book Features A new concept of leadership as fostering capacity through the complex dynamic processes of purposeful reciprocal learning Leadership strategies constructed from the values of learning democracy equity and diversity Professional learning designed to involve community members in building leadership capacity A timely approach for the effective implementation of the Every Child Succeeds Act S 1177 An in depth analysis of the standards movement through the lens of capacity building An understanding of systemic change as an organic process arising from practice rather than being imposed on practice approaches that unleash a sense of agency and wisdom This book strikes a chord with those who believe that emerging leadership should define the experiences of students and teachers alike Deborah Walker Collaborative for Teaching and Learning CTL The authors have designed a model that is at once sustainable distributive ecological and transformational Dean Fink author and consultant Describes organizational conditions that promote skillful dialogue continual learning building trust and sharing a common vision among members In such schools teachers become the leaders of learning and students become the leaders of the future Arthur L Costa professor emeritus California State University Sacramento
