Experiment in Autobiography; Discoveries and Conclusions of a Very Ordinary Brain (Since 1866) H. G. Wells, 2022-08-16 In Experiment in Autobiography Discoveries and Conclusions of a Very Ordinary Brain Since 1866 H G Wells provides a deeply introspective narrative that intricately weaves together personal anecdotes societal critiques and visionary observations on the trajectory of modern civilization Written in a candid yet reflective style

the autobiography spans Wells's life offering readers insights into the philosophical and sociopolitical influences that shaped his thinking. The book is not merely a recounting of events; it serves as a commentary on the evolution of human thought and potential, exploring the intersections of science, technology, and humanism at a pivotal time in history. H. G. Wells, often hailed as the father of science fiction, was a prolific writer engaged deeply with the social issues of his time. His background as a teacher and his experiences in the tumult of early 20th-century England inform much of the narrative. Drawing from his diverse career and keen observations, Wells illustrates how the ordinary can lead to extraordinary insight, aligning his life experiences with a broader human context. This book is highly recommended for readers interested in the philosophical underpinnings of modern thought as well as admirers of Wells's fiction. *Experiment in Autobiography* is a masterfully crafted exploration that invites reflection on one's own experiences and the shared human journey, making it an essential read for anyone seeking to understand the complexities of the human condition.

Twin Ambitions - My Autobiography Mo Farah, 2013-10-10 Hodder British track records at 5000m, 3000m indoors and 10k on the road have all fallen to Mohamed Mo Farah, the boy from Somalia who came to Britain at the age of eight, leaving behind his twin brother and with just a few words of English and a natural talent for running. His secondary school PE teacher Alan Watkinson spotted his potential and began easing this human gazelle towards the racetrack. In 2001, Mo showed his promise by winning the 5000m at the European Junior Championships. Soon he was smashing a string of British and European records. He began living with a group of elite Kenyan runners following their strict regime of run, sleep, eat, and rest. Mo was determined to leave no stone uncovered in his bid for distance running glory. After a disappointing Olympics in Beijing, Mo took the bold decision to relocate to Portland, Oregon, to work under legendary coach Alberto Salazar. The results were emphatic as Mo took silver at the 10,000m and then raced to gold in the 5000m at the 2011 World Championships in Daegu. Even better would soon follow at London 2012.

TWIN AMBITIONS is much more than an autobiography by a great Olympic champion. It's a moving human story of a man who grew up in difficult circumstances, separated from his family at an early age, who struggled to overcome seemingly insurmountable obstacles and realise his dream.

Autobiography of a Genius Jacob Levy Moreno, 2019-02-16 J. L. Moreno writes: Being a genius does not consist only of

having ideas This is essential but is a far later phase of genius Being a genius starts with a feeling of being in contact with the whole universe a feeling of totality being fed by it free of charge and feeding it gratefully in return In this book the presentation of his life vision and life s work Moreno gives countless portals for the opening of contact with the whole universe to a feeling of totality This totality is what motivated him and has also motivated the editor for much of his life The direct felt experience of this totality is at the center of religious existential and spiritual traditions and in this book we have an uncloaked method for the same enlightenment process The totality and wholeness of life can be found in the enactment of Moreno s method What can be greater than to really live this and to give it to others **University Library of**
