Parameter Setting In Language Acquisition Dalila Ayoun:

Parameter Setting in Language Acquisition Dalila Ayoun, 2005-02-28 This book provides a broad overview of parameter setting theory in first and second language acquisition and refines the theory by revisiting and challenging the traditional assumptions that underlie it based on cross linguistic language data that cover a range of syntactic and phonological phenomena From an historical perspective on parameter setting theory to an introduction to its role in computational linguistics neurolinguistics and language change the reader will find a critique of the most commonly made arguments as well as an index of all the syntactic phonological lexical and morphological parameters presented in the literature to date A closer look at the theory itself addresses the following questions What does a parameter setting approach to language acquisition entail What are the underpinnings of the theory What issues and problems remain to be solved The empirical studies carried out to test the null subject parameter and verb movement parameter are reviewed to re examine long standing theoretical assumptions as well as the learnability implications for first and second language acquisition

The Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This monograph addresses this question by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications Young Language Learners' Motivation and Attitudes Sybille Heinzmann, 2013-06-20 Taking three different perspectives this book looks at primary school children s language learning motivation and language attitudes In adopting a longitudinal perspective the book fills a research gap and provides a macro level analysis of motivational development over time It reveals a surprising amount of stability in primary school children s motivational and attitudinal development The comparative perspective looks at the learners affective dispositions with regard to English theorized as a global language and French theorized as a national language The comparisons between global language and national language are relevant across the world especially in situations where instruction in languages other than English struggles to get attention The results reveal sizeable differences between the two languages with children being substantially more motivated to learn English than to learn French Finally the explanatory section identifies key antecedents of the learners motivational and attitudinal dispositions and thereby opens

up paths for intervention relevant for those working in the field of language instruction

The L2 Acquisition of Spanish Subjects Margaret Quesada, 2015-07-01 There is a long overdue need to address the sharp philosophical and methodological divide between formal generative and functional discourse perspectives in contemporary theoretical linguistics and L2 acquisition Language structure in general and the use of subjects in particular is dependent upon multiple syntactic lexico semantic and discourse pragmatic factors Therefore the study of L2 acquisition must be equally multi faceted This volume examines data from over twenty years of research in the L2 acquisition of Spanish subjects from several theoretical perspectives including generative approaches processing theory discourse pragmatics and sociolinguistic variationist models By so doing the author seeks to fulfill two principal objectives the first is to determine the many linguistic and extra linguistic properties of Spanish subjects that constrain their acquisition and use and the second is to establish common ground among researchers from varied theoretical persuasions in acquisition studies The author argues throughout the volume that central to native speaker use and L2 acquisition are universal properties ranging from highly specific syntactic principles to more general characteristics of human cognition and a range of these properties is responsible for language acquisition An examination of the diverse body of research that considers a wider scope of universal properties of language can thus bring us closer to a unified account of the L2 acquisition of Spanish subject expression

Arabic Second Language Learning and Effects of Input, Transfer, and Typology Mohammad T. Alhawary, 2019-02-25 Despite the status of Arabic as a global language and the high demand to learn it the field of Arabic second language acquisition remains underinvestigated Second language acquisition findings are crucial for informing and advancing the field of Arabic foreign language pedagogy including Arabic language teaching testing and syllabus design Arabic Second Language Learning and Effects of Input Transfer and Typology provides data driven empirical findings for a number of basic and high frequency morphosyntactic structures with two novel typological language pairings examining Arabic second language acquisition data from adult L1 Chinese and Russian speaking learners of Arabic as a foreign language Alhawary s study examines the different processes hypotheses and acquisition tendencies from the two learner groups and documents the extent of the successes and challenges faced by such learners in their L2 Arabic grammatical development during the first three years of learning the language In addition the book offers both theoretical and practical implications related to input exposure L1 and L2 transfer and typological and structural proximity effects This book serves as a valuable resource for both second language acquisition experts and foreign language teaching practitioners

Parameter Theory and Linguistic Change Charlotte Galves,Sonia Cyrino,Ruth Lopes,Filomena Sandalo,Juanito Avelar,2012-11-01 This book focuses on some of the most important issues in historical syntax In a series of close examinations of languages from old Egyptian to modern Afrikaans leading scholars present new work on Afro Asiatic Latin and Romance Germanic Albanian Celtic Indo Iranian and Japanese The book revolves around the linked themes of parametric theory and the dynamics of language change The former is a key element in the search for explanatory adequacy in historical syntax if the notion of imperfect learning for example explains a large element of grammatical change it is vital to understand how parameters are set in language acquisition and how they might have been set differently in previous generations The authors test particular hypotheses against data from different times and places with the aim of understanding the relationship between language variation and the dynamics of change Is it possible for example to reconcile the unidirectionality of change predominantly expressed in the phenomenon of grammaticalization with the multidirectionality predicted by generativist approaches In terms of the richness of the data it examines the broad range of languages it discusses and the use it makes of linguistic theory this is an outstanding book not least in the contribution it makes to the understanding of language change

French Applied Linguistics Dalila Ayoun,2007-01-11 This state of the art volume on French Applied Linguistics includes two introductory chapters the first summarizes the past present and future of French in applied linguistics and the second reviews the history of French from a sociolinguistic perspective The six chapters of the first part cover the core aspects of the second language acquisition of French phonology semantics syntax syntax morphology pragmatics sociolinguistics and grammatical gender The seven chapters of the second part explore the contribution of French in various subfields of applied linguistics such as language ideology and foreign language pedagogy corpus linguistics and French Sign Language A chapter studies the role of affective variables on language learning while another investigates natural language and lexical creativity The chapters on creole studies and applied linguistics in West Africa address issues in first and second language acquisition in complex sociolinguistic and political contexts The last chapter serves as an epilogue focusing on Louisiana a region rich in linguistic history

More than Nature Needs Derek Bickerton,2014-01-13 How did humans acquire cognition more powerful than a hunting gathering primate needed to survive Combining state of the art research with forty years of writing about language evolution Derek Bickerton resolves a crucial problem that both biology and cognitive science have ignored how animal thinking escaped the prison of the here and now
