GRADE 5 ELA/ENGLISH LITERACY • UNIT 1 • LESSON 1

Today you will research an experiment involving elephants. First, you will read an article about the experiment. Then you will view a video and read a passage of the actual study. As you review these sources, you will gather information and answer questions about how the sources present information so you can write an analytical essay.

Read the article "Elephants Can Lend a Helping Trunk." Then answer the questions.

Elephants Can Lend a Helping Trunk

by Virginia Morell

1 Elephants know when they need a helping trunk—or rather trunk. That's the conclusion of a new study that tested the cooperative skills of Asian elephants (*Elephas maximus*) in Thailand and showed that the pachyderms understood that they will fail at a task without a partner's assistance. The ability to recognize that you sometimes need a little help from your friends is a sign of higher social cognition, psychologists say, and is rarely found in other species. Elephants now join an elite club of social cooperative chimpanzees, hyenas, meerkats, and humans.

2 To test the elephants' cooperative skills, a team of scientists modified a classic experiment first administered to chimpanzees in the 1930s, which requires two animals work together to earn a treat if they don't cooperate, neither gets the reward. For the elephants, the researchers used a sliding table with a single treat threaded
