housing, through the Balston Grade SR Microfibre® Filter Cartridge (outside-to-inside flow), and then downward to the exit port. The Grade SR Microfibre Filter Cartridge, rated at 98+ % efficiency for 0.01 micron and larger particles, removes essentially all the suspended solid particles and the remaining water droplets. The water draining from the filter cartridge and the expansion chamber is automatically removed from the housing by the automatic condensate drain.

The Balston Grade SR Microfibre Filter Cartridge, the heart of the Model 23SR Filter, combines rugged construction with remarkably efficient filtration of solid particles and liquid droplets. Solid particles remain trapped in the depth of the filter cartridge, while liquid water drips from the filter cartridge to the automatic drain. The Microfibre Filter Cartridge is constructed from chemically inert borosilicate glass fibers and a fluorocarbon resin binder. The filter cartridge is completely free of impurities which could extract into the steam, and is in compliance with USFDA regulations as stated.
