*Dreaming the Biosphere* Rebecca Reider, 2009-11-16 Biosphere 2 rises from southern Arizona's high desert like a bizarre hybrid spaceship and greenhouse Packed with more than 3 800 carefully selected plant animal and insect species this mega terrarium is one of the world's most biodiverse lush and artificial wildernesses Only recently transformed from an abandoned ghost dome to a University of Arizona research center the site was the setting of a grand drama about humans and ecology at the end of the twentieth century The seeds of Biosphere 2 sprouted in the 1970s at Synergia a desert ranch in New Mexico where John Allen and a handful of dreamers united to create a self-reliant utopia centered on ecological work study and their traveling experimental theater troupe The Theater of All Possibilities At a time of growing tensions in the American environmental consciousness the Synergians took on varied projects around the world that sought to mend the rift between humans and nature In 1984 they bought a piece of desert to build Biosphere 2 Eco enthusiasts competed to become the eight biospherians who would lock themselves inside the giant greenhouse world for two years to live in harmony with their wilderness grow their own food and recycle all their air water and wastes Thin and short on oxygen the biospherians stoically completed their survival mission but the communal spirit surrounding Biosphere 2 eventually dissolved into conflict ultimately the facility would be seized by armed U S Marshals Yet for all the story's strangeness perhaps strangest of all was how normal Biosphere 2 actually was The story of this grand eco-utopian adventure and misadventure becomes a parable about the relationship between humans and nature in postmodern America Visit the authors website at [www.dreamingthebiosphere.com](http://www.dreamingthebiosphere.com)
