

My Personal Culture

Culture defines people's values, beliefs, and personal interests. Culture is important because it allows people to maintain a unique identity society. Many cultures have common interests, while others may have customs that differ greatly from that of another.

Technology has had a huge impact on present day cultures. Many culture have been altered including my own, and some have been created due to the rise of technology. Cultures differ so greatly that someone belonging to one culture may not agree with the values of another, which then causes social and ethical issues. My culture shares many similarities with others around the world; most of which have connected more people in recent years than ever before.

Cultural gaps, and lack of understanding for peoples' values and beliefs are significant reasons why cultures fail to understand one another. For instance, I am African-American, but I don't like to identify myself as an African-American. I was not born in Africa, therefore I do not consider myself African American. I say this because it creates cultural confusion.

A man born and raised in Africa would not put himself in the same light as a black man born in America. Africans have their own identities, and most prefer to keep it that way. Former Yale professor and expert on African culture Tracie Reddick says "Africans and black Americans often fail to forge relationships in the classrooms and the workplace. They blame nationality, ethnicity, culture, economics, and education" (Reddick).

There are plenty of cultural gaps within race alone, and that is why personal culture is so unique and important. I have the same skin color as an African, but that is pretty much it. What may be important to someone from Nigeria could mean nothing to me. That just shows how two cultures that seem similar differ.

That is my attitude towards my inner culture, and it differs substantially from older generations. In the past, things were primarily about skin color, and issues regarding people of a particular skin color were handled by such, and not ethnicity. Black people were black people, whites were whites, and so on. The point is that by distinguishing myself from a general role, I am able to have my own identity, and I can make choices for my best interest, and not for the majority.

In spite of their differences, both African and African-American culture have been able to connect in certain ways in recent years, as well as other cultures. Technology, specifically social media has allowed my generation to connect with one another even with our cultural differences. There is a chemistry that exists within my generation that my parent's generation never could have imagined was possible. The International Association of Business Communicators says "At its core, social media are about sharing information across boundaries.

We can now find out what we want from whomever we want. Social media is break

Personal Culture Paper:

Personal Discipline and Material Culture Paul A. Shackel, 1993 This unique study looks at the role material goods played in shaping our culture Using archaeological data probate inventories and etiquette books Paul A Shackel has collected valuable information on eighteenth and nineteenth century material items which when analyzed in historical context reveals how these items have shaped the development of western culture Specific examples from the Chesapeake area of Maryland show how individuals and groups responded to social and economic crises by using material goods to define power relations create social hierarchies and preserve the social order Shackel argues that during the pre industrial era society s elite introduced hard to find material items like the fork with rules of etiquette to maintain social distance and stratification As the Industrial Revolution made material items cheaper and easier to obtain the non elite began to adopt regular usage of particular items as part of standardized behavior while the elite sought to maintain their status with newer and different material goods Focusing on how the spread of capitalism affected various social groups Shackel pays specific attention to culture and consumption and symbolic qualities of material culture His analysis incorporates a review of etiquette literature from the late medieval era to provide a global context for regional behavior and material culture **BEd Semester 1 Paper**
