NEWTON'S LAWS

X-planation

THE NATURE OF FORCES

Forces can be divided into two categories: **contact forces** and **non-contact forces**.

- The following are non-contact forces:
 - **Gravitational forces** – between a planet and an object on the planet
 - **Electrostatic forces** – between charged objects
 - **Magnetic forces** – between magnets
- Examples of contact forces include **normal, frictional, tensional and applied forces**

NEWTON'S THIRD LAW

When body A exerts a force on body B, body B exerts an equal and opposite force on body A.

Please note the following, regarding Newton's 3rd Law:

- in every interaction, there is a pair of forces acting on the two interacting objects.
- the size of the force on the first object **equals** the size of the force on the second object.
- the direction of the force on the first object is **opposite** to the direction of the force on the second object.
- these forces are referred to as action-reaction pairs.
- **These forces are acting on separate objects.**
