The Place of Stone Douglas Hunter,2017-08-04 Claimed by many to be the most frequently documented artifact in American archeology Dighton Rock is a forty ton boulder covered in petroglyphs in southern Massachusetts First noted by New England colonists in 1680 the rock s markings have been debated endlessly by scholars and everyday people alike on both sides of the Atlantic The glyphs have been erroneously assigned to an array of non Indigenous cultures Norsemen Egyptians Lost Tribes of Israel vanished Portuguese explorers and even a prince from Atlantis In this fascinating story rich in personalities and memorable characters Douglas Hunter uses Dighton Rock to reveal the long complex history of colonization American archaeology and the conceptualization of Indigenous people Hunter argues that misinterpretations of the rock s markings share common motivations and have erased Indigenous people not only from their own history but from the landscape He shows how Dighton Rock for centuries drove ideas about the original peopling of the Americas including Bering Strait migration scenarios and the identity of the Mound Builders He argues the debates over Dighton Rock have served to answer two

questions Who belongs in America and to whom does America belong Physical Oceanography Processes at Eastern Boundary Upwelling Systems Francisco Machin, Jose Gomez-Valdes, 2023-12-29 Eastern boundary upwelling systems EBUS have historically received attention from the scientific community due to their impact on the economic development of these highly productive systems Remote sensing numerical modeling and in situ observations have increased their spatial and temporal resolutions during the last 40 years in their strategy to provide reliable products about the actual state of the ocean The assembly of several data sources currently constitutes an opportunity to increase our knowledge about the present and future state of the relatively narrow and highly variable EBUS The primary forcing mechanism in the upwelling regions is the wind stress in areas close to the coast Long term trends in wind intensity in upwelling areas present considerable uncertainties as the different wind databases produce divergent results On the other hand although the effect of climate change in the interior ocean is increasing temperatures in upwelling areas the long term trends seem to be in the opposite direction Hence assessing the long term impact of the environmental conditions on upwelling development represents a major challenge for the scientific community This special issue aims to discuss the state of the art understanding of dynamical processes governing the ocean at the eastern boundary upwelling systems in a changing ocean **Occupational Therapy in Psychiatry and Mental Health** Rosemary Crouch, Vivyan Alers, 2014-07-30 Comprehensive and informative the extensively revised fifth edition of Occupational Therapy in Psychiatry and Mental Health is an accessible overview of occupational therapy in psychiatry providing key information on a range of international models of occupational therapy as well as their practical applications The fifth edition includes Case studies throughout to illustrate application of theory to practice Coverage of key concepts and issues in occupational therapy New material on emerging areas of practice Comprehensive information on assessment and treatment for children adolescents and adults covering key mental health conditions Occupational Therapy in Psychiatry and Mental Health is an ideal resource for students in occupational therapy newly qualified and experienced practitioners and other allied health professionals seeking an up to date globally relevant resource on psychiatry and mental health care **Carbon Bridge to the Arctic** Marit Reigstad, Maria Vernet, Jacob Carstensen, Camilla Svensen, 2020-06-22 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **Impact of Deep Oceanic Processes on Circulation and Climate Variability: Examples from the Mediterranean Sea and the Global Ocean** Vincenzo Artale, Nadia Lo Bue, Katrin Schroeder, Vassilis Zervakis, 2022-02-03 Domestic Violence in International Context Diana

Scharff Peterson, Julie Schroeder, 2016-12-19 Domestic violence does not discriminate and is prevalent throughout the world regardless of race age or socio economic status Why then do reactions and response differ so widely throughout the world While some countries work diligently to address the matter through prevention and training others take a hands off approach in their response This book is one of the first to investigate domestic violence on a global scale and provides best practices gleaned from various countries around the world to paint a detailed picture of how police response to domestic violence is currently being conducted and provide training bodies with up to date information to enhance current curricula Domestic Violence in International Context brings together expert scholars native to twelve different countries to examine the history and scope of domestic violence and how it is being addressed repressed or ignored in their thirteen respective countries Their specialised knowledge and unique data come together to create a series of snapshots that will guide nations societies and communities worldwide in formulating effective strategies to prevent intervene and combat this epidemic and examine partnerships and programmes already in place This book is essential reading for practitioners policy makers and human rights organisations as well as students and scholars of criminology social work sociology and law *Small Town Tourism in South Africa* Ronnie Donaldson, 2017-10-14 This book investigates small town tourism development in South Africa taking into account the most common strategies branding promotion festivals and theming The contents of the book resonate with the intersection of the power elite and their impacts on small town tourism Because the book focuses on small town geographies in South Africa the literature on small town tourism in the country is reviewed in Chapter 2 to provide a contextual background Each subsequent chapter begins with an overview of international literature to give the conceptual context of the case studies each chapter explores In Chapter 3 the concept of small town tourism branding is illustrated by an exploration of the Richmond book town In Chapter 4 the branding theme is probed further in an investigation of two winners of the Kw la Town of the Year competition namely Fouriesburg and De Rust Chapter 5 documents the branding of Sedgfield through its proclamation as Africa s first Cittaslow slow town a process driven by the local power elite to the exclusion of town s poor who have no understanding of the intentions of the Cittaslow movement and its potential benefits for the town Chapter 6 is a case study of Greyton s tourism led rural gentrification by which a small town has transformed in three decades to become a sought after place of residence for elite immigrants so making the town a jewel tourism destination while reinforcing racial segregation Because festivals and events creations of the wealthy have made significant financial contributions to small towns Chapter 7 considers festivals and events as strategies to market and brand small towns in a particular way Case studies of the economic impacts of festivals on small towns are assessed and the assessment methodologies used are critiqued Chapter 8 provides a synthesis by drawing on the thesis of the urban growth machine by power elites **Working with indigenous knowledge** Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes

practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research **Past**

Echoes of Africa's Past. Archaeological explorations in the Anthropocene Savino di Lernia, 2025-05-30 Marking the 70th anniversary of the Libyan Italian archaeological Mission in the Tadrart Acacus and Messak this volume offers a multidisciplinary reflection on Africa's deep past and its enduring legacies in the Anthropocene By tracing the echoes of human environment interactions across time it highlights how archaeological research continues to reshape our understanding of adaptation resilience and transformation in African societies Drawing on interdisciplinary approaches including palaeoecology bioarchaeology rock art analysis the archaeology of food production and their various connections and networks this book challenges outdated Eurocentric narratives by foregrounding African agency and complexity Key themes include among others the Holocene environmental changes that influenced settlement patterns the significance of rock art in interpreting past belief systems and the impact of colonial trade and imperial expansion on indigenous communities Echoes of Africa's Past serves as a resource for archaeologists historians anthropologists and heritage scholars offering fresh perspectives on Africa's dynamic past and its relevance to debates on sustainability and cultural heritage in the Anthropocene Archaeological knowledge is incremental and hard won It is assembled through time intensive study of fragmentary evidence and its corpus represents intergenerational effort Though sometimes based on the study of stones our interpretations are not written in them Our working hypotheses typically run ahead of the evidence needed to assess them Expanded investigations new methods and changing premises compel revision and sometimes outright rejection of earlier ideas Typological aids deemed useful by earlier generations may outlive their usefulness at the same time as the evidence they organize remains pertinent and available for rethinking The cumulative character of archaeological knowledge enables scalar perspectives across space and through time casting what we know of one location in relief through comparison to others These revisions rethinkings and scalar reflections encourage us to appreciate the complexity and diversity of past contexts as amply illustrated in contributions to this volume In short resuscitating echoes of Anthropocene Africa is painstaking work In this way and others archaeology is and should be slow science Ann B Stahl University of Victoria BC Canada

Monogenetic Volcanism K. Németh,G. Carrasco-Núñez,J.J. Aranda-Gómez,I.E.M. Smith ,2017-06-20

The nature and origin of the small scale volcanic systems generally referred to as monogenetic have enjoyed an elevated level of interest during the past decade There has been recognition that their ostensibly simple volcano types are a window into the nature of explosive volcanism landscape evolution and the processes of magma generation in the Earth s upper mantle In the past few years major conferences have offered specialized technical sessions dealing with monogenetic volcanism and there have been thematic conferences such as the IAVCEI International Maar Conference series which have provided a focus for discussion of volcanological and geochemical aspects of small scale basaltic volcanism Many new aspects of monogenetic volcanism have emerged and have clearly demonstrated that this volcanism can be very complex on a fine scale This book is a collection of papers arising from two recent Maar Conferences the fifth in Queretaro Mexico and the sixth in Changchun China and serves as a snapshot of current research on monogenetic volcanism
