Open Access on Cambridge Core Physical Oceanography Processes at Eastern Boundary Upwelling Systems Francisco Machin, Jose Gomez-Valdes, 2023-12-29 Eastern boundary upwelling systems EBUS have historically received attention from the scientific community due to their impact on the economic development of these highly productive systems Remote sensing numerical modeling and in situ observations have increased their spatial and temporal resolutions during the last 40 years in their strategy to provide reliable products about the actual state of the ocean The assembly of several data sources currently constitutes an opportunity to increase our knowledge about the present and future state of the relatively narrow and highly variable EBUS The primary forcing mechanism in the upwelling regions is the wind stress in areas close to the coast Long term trends in wind intensity in upwelling areas present considerable uncertainties as the different wind databases produce divergent results On the other hand although the effect of climate change in the interior ocean is increasing temperatures in upwelling areas the long term trends seem to be in the opposite direction Hence assessing the long term impact of the environmental conditions on upwelling development represents a major challenge for the scientific community This special issue aims to discuss the state of the art understanding of dynamical processes governing the ocean at the eastern boundary upwelling systems in a changing ocean **The Palgrave Handbook of Critical Physical Geography** Rebecca Lave, Christine Biermann, Stuart N. Lane, 2018-04-04 This handbook is recognition of the need to better integrate physical and human geography It combines a collection of work and research within the new field of Critical Physical Geography which gives critical attention to relations of social power with deep knowledge of a particular field of biophysical science Critical Physical Geography research accords careful attention to biophysical landscapes and the power relations that have increasingly come to shape them and to the politics of environmental science and the role of biophysical inquiry in promoting social and environmental justice The Palgrave Handbook of Critical Physical Geography lays out the scope and guiding principles of Critical Physical Geography research It presents a carefully selected set of empirical work demonstrating the range and intellectual strength of existing integrative work in geography research This handbook is the first of its kind to cover this emerging discipline and will be of significant interest to students and academics across the fields of geography the environment and sustainability **The Place of Stone** Douglas Hunter, 2017-08-04 Claimed by many to be the most frequently documented artifact in American archeology Dighton Rock is a forty ton boulder covered in petroglyphs in southern Massachusetts First noted by New England colonists in 1680 the rock s markings have been debated endlessly by scholars and everyday people alike on both sides of the Atlantic The glyphs have been erroneously assigned to an array of non Indigenous cultures Norsemen Egyptians Lost Tribes of Israel vanished Portuguese explorers and even a prince from Atlantis In this fascinating story rich in personalities and memorable characters Douglas Hunter uses Dighton Rock to reveal the long complex history of colonization American archaeology and the conceptualization of Indigenous people Hunter argues that misinterpretations of the rock s markings share common motivations and have erased Indigenous people not only from

their own history but from the landscape He shows how Dighton Rock for centuries drove ideas about the original peopling of the Americas including Bering Strait migration scenarios and the identity of the Mound Builders He argues the debates over Dighton Rock have served to answer two questions Who belongs in America and to whom does America belong

Tsujino,2022-08-04 **Small Town Tourism in South Africa** Ronnie Donaldson,2017-10-14 This book investigates small town tourism development in South Africa taking into account the most common strategies branding promotion festivals and theming The contents of the book resonate with the intersection of the power elite and their impacts on small town tourism Because the book focuses on small town geographies in South Africa the literature on small town tourism in the country is reviewed in Chapter 2 to provide a contextual background Each subsequent chapter begins with an overview of international literature to give the conceptual context of the case studies each chapter explores In Chapter 3 the concept of small town tourism branding is illustrated by an exploration of the Richmond book town In Chapter 4 the branding theme is probed further in an investigation of two winners of the Kw la Town of the Year competition namely Fouriesburg and De Rust Chapter 5 documents the branding of Sedgfield through its proclamation as Africa s first Cittaslow slow town a process driven by the local power elite to the exclusion of town s poor who have no understanding of the intentions of the Cittaslow movement and its potential benefits for the town Chapter 6 is a case study of Greyton s tourism led rural gentrification by which a small town has transformed in three decades to become a sought after place of residence for elite immigrants so making the town a jewel tourism destination while reinforcing racial segregation Because festivals and events creations of the wealthy have made significant financial contributions to small towns Chapter 7 considers festivals and events as strategies to market and brand small towns in a particular way Case studies of the economic impacts of festivals on small towns are assessed and the assessment methodologies used are critiqued Chapter 8 provides a synthesis by drawing on the thesis of the urban growth machine by power elites **Working with indigenous knowledge** Fhumulani M. Mulaudzi,Rachel T. Lebesse,2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research *Comprehensive Geographic Information Systems* ,2017-07-21 Geographical Information Systems
