 Connected by a computer telecommunications network ninth graders from eight high schools scattered thousands of miles
 across Alaska work together building a robot submarine to gather samples from the floor of Prince William Sound This is high
 school science as some teachers and educational reformers today envision it centered on student projects that encourage
 learning by doing supported by modern technology enriched by collaboration among students and teachers both face to face
 and far apart This example is drawn from LabNet a three year effort funded by the National Science Foundation The project
 was conducted by Technical Education Research Centers TERC a nonprofit educational organization dedicated to improving
 mathematics and science education Eventually reaching 562 teachers in 37 states Puerto Rico and American Samoa LabNet
 had a direct impact on their classroom practice In a follow up evaluation the majority said they had assigned their students
 more projects and had used LabNet s telecommunications network to exchange project ideas with other teachers This book is
