Democratization in Iraqi Kurdistan assesses the implications of social media usage for democratization in the context of Iraqi Kurdistan. A considerable number of studies examine the impact of social media on the practice of democracy in liberal democratic contexts and on the democratization process in nondemocratic contexts. However, little is known about the rise and implications of using the Internet and social media platforms for democratization processes in a hybrid political system like that of Iraqi Kurdistan, which combines elements of both democracy and authoritarianism. The author investigates the use of social media platforms by citizens, politicians, electoral candidates, and political parties and its significance for political participation and political communication, which are selected as important elements of democratization. Based on original qualitative research, including interviews with activists, politicians, and party leaders, and an analysis of relevant social media content in the Kurdish language, especially on the social media platform Facebook, the author argues that, rather than the increase in online political participation and political communication contributing to the consolidation of democracy in the Kurdish nascent democracy, it is increasing political polarization, exacerbating incivility of political discourse, and enabling monitoring of opposition forces by the authorities.

Professional Practice and Learning Nick Hopwood, 2016-01-22. This book explores important questions about the relationship between professional practice and learning and implications of this for how we understand professional expertise. Focusing on work accomplished through partnerships between practitioners and parents with young children, the book explores how connectedness in action is a fluid, evolving accomplishment with four essential dimensions: times, spaces, bodies, and things. Within a broader sociomaterial perspective, the analysis draws on practice theory and philosophy, bringing different schools of thought into productive contact, including the work of Schatzki, Gherardi, and recent developments in cultural historical activity theory. The book takes a bold view, suggesting that practices and learning are entwined but distinctive phenomena. A clear and novel framework is developed based on this idea. The argument goes further by demonstrating how new coproductive relationships between professionals and clients can intensify the pedagogic nature of professional work and showing how professionals can support others' learning when the knowledge they are working with and sense of what is to be learned are uncertain, incomplete, and fragile.

Cambridge Handbook of Research Approaches to Business Ethics and Corporate Responsibility Patricia H. Werhane, R. Edward Freeman, Sergiy Dmytriiev, 2017-11-16. While there is a large and ever-expanding body of work on the fields of business ethics and corporate social responsibility (CSR), there is a noted absence of a single source on the methodology and research approaches to these fields. In this book, the first of its kind, leading scholars in the fields gather to analyse a range of philosophical and empirical approaches to research in business ethics and CSR. It covers such sections as historical approaches, normative and behavioural methodologies, quantitative, qualitative, and experimental perspectives, grounded theory, and case methodologies, and finally a section on the role of the researcher in research projects. This book is a valuable and essential read for all researchers in business ethics and CSR, not only for those starting out in the fields but also for seasoned scholars and
