Cann, 2014-06-26 For millennia the rituals of death and remembrance have been fixed by time and location but in the twenty first century grieving has become a virtual phenomenon Today the dead live on through social media profiles memorial websites and saved voicemails that can be accessed at any time Virtual Afterlives Grieving the Dead in the Twenty First Century investigates popular and emerging bereavement traditions *Understanding Migrant Decisions* Belachew Gebrewold, Tendayi Bloom, 2016-06-10 Examining how changing conditions in the Mediterranean Region have affected the decisions of those considering migrating from Sub Saharan Africa to or through the Region this book represents an important and overdue contribution to international policy making and academic discourse In current discussions relating to this migration phenomenon the complexity of individual decision making is often left unacknowledged so that subsequent policy responses draw upon simplified models In this volume individual decision making takes central

stage by bringing together chapters that demonstrate very different types of decision making frameworks In this project it is highlighted that people move for a variety of reasons such as being affected by conflict and insecurity by economic pressures and by desire for other forms of enrichment Throughout the book s contributors find that events in the Mediterranean cannot be considered alone in understanding migration decision making from Sub Saharan Africa but as part of an increasingly complicated global system not encompassed by one simplified theory or by looking at one regional context in isolation Knowing why individual people are moving and how they decide upon which routes to take can help to ensure policy that promotes safer travel options or makes genuine alternatives to migration available

Immigration Detention in the European Union Izabella Majcher,Michael Flynn,Mariette Grange,2020-03-04 This book offers a unique comparative assessment of the evolution of immigration detention systems in European Union member states since the onset of the refugee crisis By applying an analytical framework premised on international human rights law in assessing domestic detention regimes the book reveals the extent to which EU legislation has led to the adoption of laws and practices that may disregard fundamental rights and standards While emphasizing policies and laws adopted in response to the refugee crisis the volume also shows how these policies have evolved and in many cases grown more restrictive even as the crisis has begun to recede from the borders of many European countries To sharpen awareness of contrasting developments across the region the book s country chapters are organised into geographic sections that reveal how variations in migration pressures have in some cases resulted in contrasting detention practices even as the EU directives have sought to harmonise immigration laws A critical focus of the book are the evolving domestic norms related to grounds for detention length of detention non custodial alternatives to detention the treatment of children and conditions of detention With its systematic and comparative assessment of immigration detention regimes across the EU the book will be helpful for both academics and practitioners who seek a comprehensive guide to the evolution of one of today s more important human rights dilemmas states efforts to control global migration
