Administrative Rulemaking and Planning in European Laws Giacinto della Cananea, Angela Ferrari Zumbini, 2025-03-15 Administrative rulemaking and planning is an under studied and under theorized area of public law To better understand how administrative functions and powers are discharged by public authorities and private bodies this seventh volume in the Common Core of European Administrative Law series argues that we must consider all forms of administrative action not just formal procedures and judicial review As such greater attention needs to be paid to administrative rulemaking and planning which have a significant impact on economics and society Through extensive comparative research this book examines this increasingly important field of administrative law It focuses mainly on Europe analysing ten national systems including eight European Union member states Norway and the UK but it also explores the legal systems of the United States and China as well as that of a non state entity the European Union itself The questions investigated across these systems include whether administrative agencies may fetter their discretion through policy and rules whether their rules must be published and what remedies are available when plans adversely impact individual rights These questions are examined through a factual analysis based on a set of ten hypothetical cases which are discussed by national experts This comparative approach identifies commonalities and differences between legal systems such as in consultation and transparency in the rights of public service users and in legal remedies to address rules and plans As in other volumes in the series both similarity and difference are essential to understanding how a common core is shaped and evolves

Imposing Sanctions on Violent Non-State Actors to Restore International Peace and Security Christopher Huber, 2022-06-06 In the last decades violent non state actors VNSAs such as rebel and terrorist organizations have proved their capacity to break international law The international community particularly the United Nations UN has reacted to this development by redirecting its conflict resolution efforts to these non state entities This has turned targeted sanctions into one of the most vital and indispensable foreign policy tools available to the UN Security Council in combating terrorism and contributing to the peaceful resolution of intra state conflicts Despite

the UN Security Council's growing tendency to sanction VNSAs there has been little research analyzing the effects of UN targeted sanctions on these non government actors This book seeks to fill this gap and shifts the focus on non state actors by ascertaining the general mechanisms through and conditions under which UN targeted sanctions imposed on VNSAs tend to be effective The tripartite empirical analysis combining quantitative and qualitative research methods demonstrates that the state centric understanding of how sanctions work is not simply applicable to the effective sanctioning of violent non state actors such as rebel and terrorist movements

Capitalism and the Alternatives Julius H. Grey,2019-04-05 Thirty years after its global triumph neo liberalism is an abject failure While its advocates have succeeded in convincing citizens that no other way is possible that no left turn can be made without an economic collapse they have not fulfilled their promises of a better world and the result has been more inequality insecurity and speculation Many have sought solace in collective goals nationalism narrow religion and gender politics while notions of universal solidarity idealism and humanism have all but disappeared In *Capitalism and the Alternatives* Julius H Grey seeks to rehabilitate economic equality as a fundamental social goal built on universal values such as individualism liberty and even romanticism To achieve this he argues it is necessary to move away from national ethnic religious and even gender loyalties The importance in each society of common culture and widely accepted moral values Grey suggests cannot be overstated With its rampant political correctness the modern left seems to have lost sight of morality and individual freedom While most commentators stake out a partisan position in their criticism Grey s notion of individual romanticism as the basis of a socially progressive society and his stress on free will culture classical education and the right to dissent demand an overhaul of both the right and the left A fundamental rethinking of the social political and economic foundations of modern industrial society *Capitalism and the Alternatives* proposes freedom from identity instead of communitarianism and tradition as a condition for liberty and justice
