Time Traveled Krista Marson, 2023-03-07 TIME TRAVELED is a highly entertaining compendium of travel tales told by an adventurer who fancies herself a poet. Themes such as nature, history, and art rank high on her literary list, as well as loneliness and the importance of having someone to love. Tripping over the remnants of who we used to be, this explorer diligently follows the breadcrumbs left by those who came before. Krista Marson has a unique voice and infectious curiosity. Her words are often witty, sometimes poignant, and always brutally honest. She's an author who lays herself bare and writes at her best whenever she feels vulnerable. Her travel stories are highly imaginative and represent a new approach to the art of memoir writing. Her tales are refreshingly uncommon for she visits tucked-away places that few people ever travel. This book is an installment of the Memory Road Trip series, an entertaining collection of travel stories that don't require reading in any particular order. The author has traveled extensively and developed a unique perspective on the universal themes of life, love, and loneliness. She's passionate about nature, art, ruins, and how the past influences the modern age. Her memoirs are not travel journals per se but rather visceral and introspective journeys to the mysterious self.

Food, Animals, and the Environment Christopher Schlottmann, Jeff Sebo, 2018-09-14 Food, Animals, and the Environment: An Ethical Approach examines some of the main impacts that agriculture has on humans, nonhumans, and the environment, as well as some of the main questions that these impacts raise for the ethics of food production, consumption, and activism. Agriculture is having a lasting effect on this planet. Some forms of agriculture are especially harmful. For example, industrial animal agriculture kills 100 billion animals per year, consumes vast amounts of land, water, and energy, and produces vast amounts of waste, pollution, and greenhouse gas emissions. Other forms, such as local, organic, and plant-based food, have many benefits but they also have many costs, especially at scale. These impacts raise difficult ethical questions: What do we owe animals, plants, species, and ecosystems? What do we owe people in other nations and future generations? What are the ethics of risk, uncertainty, and collective harm? What is the meaning and value of natural food in a world reshaped by human activity? What are the ethics of supporting harmful industries when less harmful alternatives are available? What are the ethics of resisting harmful industries through activism, advocacy, and philanthropy? The discussion ranges over cutting-edge topics such as effective altruism, abolition, and regulation, revolution and reform, individual and structural change, single

issue and multi issue activism and legal and illegal activism This unique and accessible text is ideal for teachers students and anyone else interested in serious examination of one of the most complex and important moral problems of our time **Fire in America** Stephen J. Marietta,1995 The prevailing view of nature has begun to move away from a traditionally Western humans apart from nature attitude toward one that sees humans as a part of nature Don E Marietta describes these changes and what he perceives as a philosophical shift toward new holistic models of environmental ethics He supports a critical holism that stresses the moral importance of the interrelationship of human beings animals plants and non living things in their common dependence on the ecosphere Considering that this humanistic approach to ethics recognizes a shared responsibility to the whole system of nature Marietta explores the apparent conflict between environmental holism and the interests of individuals incorporating the perspectives of ecofeminism anthropocentrism contextualism and pluralism This approach produces an ecologically enlightened position that calls for a commitment to protecting planet Earth while recognizing that even though it may not be easy or simple we can live according to a humanistic and holistic ethic one which seeks the good for people and for the planet Author note Don E Marietta Jr is Adelaide R Snyder Distinguished Professor of Ethics and Professor of Philosophy at Florida Atlantic University *Sustainable Landscape Management* Ann Marie VanDerZanden,Thomas W.
