Interventional and Therapeutic Gastrointestinal Endoscopy Klaus Mönkemüller, C. Mel Wilcox, Miguel Muñoz-Navas, 2010 The aim of this book is to present a concise yet instructive overview of the most common interventional and therapeutic gastrointestinal endoscopic procedures Although there exists a large amount of literature dealing with therapeutic endoscopy this publication stands out for several reasons To begin with it has been written by a highly selected group of international experts who contribute their own tried and tested tips and tricks The various techniques are described in a homogeneous fashion making it easy for the endoscopist to single out the important aspects for his or her own practice Moreover the data presented follows evidence based guidelines but does not inundate the reader with confusing facts and numbers Finally the book is illustrated like an atlas featuring real life pictures enhanced by explanatory drawings and algorithms This textbook is directed at residents fellows gastroenterologists and surgeons interested in therapeutic endoscopy As the majority of the procedures described are classics that have stood the test of time it will be a useful companion for many years to come

Principles and Practice of Geriatric Surgery Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2013-06-29 More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate The 5-Minute Clinical Consult 2013 Domino,Robert A.
