Votes and Proceedings of the ... General Assembly of the State of New Jersey New Jersey. Legislature. General Assembly,1913 The Accidental Ecosystem Peter S. Alagona,2024-01-02 The Accidental Ecosystem tells the story of how cities across the United States went from having little wildlife to filling dramatically and unexpectedly with wild creatures Today many of these cities have more large and charismatic wild animals living in them than at any time in at least the past 150 years Why have so many cities the most artificial and human dominated of all Earth s ecosystems grown rich with wildlife even as wildlife has declined in most of the rest of the world And what does this paradox mean for people wildlife and nature on our increasingly urban planet The Accidental Ecosystem is the first book to explain this phenomenon from a deep historical perspective and its focus includes a broad range of species and cities Digging into the natural history of cities and unpacking our conception of what it means to be wild this book provides fascinating context for why animals are thriving more in cities than outside of them Author Peter Alagona argues that the proliferation of animals in cities is largely the unintended result of human decisions that were made for reasons having little to do with the wild creatures themselves Considering what it means to live in diverse multispecies communities and exploring how human and non human members of communities might thrive together Alagona goes beyond the tension between those who embrace the surge in urban wildlife and those who think of animals as invasive or as public safety hazards The Accidental Ecosystem calls on readers to reimagine interspecies coexistence in shared habitats as well as policies that are based on just humane and sustainable approaches Provided by publisher Assessment of Nontimber Forest Products in the United States Under Changing Conditions James L Chamberlain,2018-08-24 This Non timber Forest Products assessment serves as a baseline science synthesis and provides information for managing non timber forest resources in the United States This report provides technical input to the 2017 National Climate Assessment and closely follows the Intergovernmental Panel on Climate Change

IPCC process You will find an overview of the findings and interrelated discussions covering aspects of biophysical social cultural economic and policy dimensions of non timber forest products and the implications of the effects of climatic variabilities and change for them Appendix information summarizes non timber forest products relative to geographic regions across the country Related products Other products produced by the U S Forest Service Department of Agriculture USDA can be found here <https://bookstore.gpo.gov/agency/us-forest-service> Find more Federal documents relating to Climate Weather resources here <https://bookstore.gpo.gov/catalog/weather/climate>
