metaphorical uses of language The book then moves on to cover the philosophy of mind and outlines Searle's ideas on international states It introduces his notions of background and network his claims for the often unrecognized importance of consciousness and examines his attacks on other philosophical accounts of mind such as materialism functionalism and strong AI The final section examines Searle's later work on the construction of social reality and concludes with more general reflections on Searle's position vis a vis ontology epistemology scepticism and the doctrine of external realism

Semantics Frank Robert Palmer, 1981-08-13 When the first edition of Semantics appeared in 1976 the developments in this aspect of language study were exciting interest not only among linguists but among philosophers psychologists and logicians Professor Palmer's straightforward and comprehensive book was immediately welcomed as one of the best introductions to the subject Interest in Semantics has been further stimulated recently by a number of significant and often controversial theoretical advances and the publication of this second edition has enabled Professor Palmer to bring his survey thoroughly up to date There is also an important new chapter on Semantics and logic showing clearly and simply the influence that logical models have had on the study of meaning Professor Palmer always illustrates his argument with helpful examples and his non technical explanations will be readily intelligible to the interested layman as well as to beginning students of language and linguistics

Levinson, 1987-02-27 This study is about the principles for constructing polite speeches The core of it first appeared in Questions and Politeness edited by Esther N Goody now out of print It is here reissued with a fresh introduction that surveys the considerable literature in linguistics psychology and the social sciences that the original extended essay stimulated and suggests distinct directions for research The authors describe and account for some remarkable parallelisms in the linguistic construction of utterances with which people express themselves in different languages and cultures A motive for these parallels is isolated and a universal model is constructed outlining the abstract principles underlying polite usages This is based on the detailed study of three unrelated languages and cultures the Tamil of South India the Tzeltal spoken by Mayan Indians in Chiapas Mexico and the English of the USA and England This volume will be of special interest to students in linguistic pragmatics sociolinguistics applied linguistics anthropology and the sociology and social psychology of interaction

chapter and offers guidance and suggested solutions at the end of the volume Written by one of the leading scholars in the field this new edition will continue to be an ideal textbook for students of linguistics and a valuable resource for scholars and students of language in philosophy psychology anthropology and computer science **Interrogativity** William Chisholm, Louis Tonko Milic, John A. C. Greppin, 1984-01-01 This is a comparative study on the subject of interrogativity presenting broad and narrow attributes on this subject in diverse languages Russian Mandarin Georgian Bengali Bantu Japanese West Greenlandic and Ute Each contribution presents first the basic facts about the language in question its more recent provenience facts about numbers of speakers writing systems and related areal and sociolinguistic points An overview of the typological hallmarks follows together with a sketch of the grammar broadly construed Finally the grammar of interrogativity is described and the semantics and pragmatics of it are explored
