What Price Utopia? Daphne Patai, 2008-05-20 This volume brings together for the first time more than two dozen of Daphne Patai's incisive and at times satirical essays dealing with the academic and intellectual orthodoxies of our time Patai draws on her years of experience in an increasingly bizarre academic world where a stifling politicization threatens genuine teaching and learning Addressing the rise of feminist dogma the domination of politics over knowledge the shoddy thinking and moralizing that hide behind identity politics and the degradation of scholarship her essays offer a resounding defense of liberal values Patai takes aim at the unctuous and also dangerous posturing that has brought us restrictive speech codes harassment policies and a vigilante atmosphere while suppressing plain speaking about crucial issues But these trenchant essays are not limited to academic life for the ideas and practices popularized there have spread far beyond campus borders Included are two new pieces written especially for this volume one on the bullying tactics of a famous feminist and the other on Islamic fundamentalism

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2011-10-30 This Handbook presents both a theoretical and practical approach to conducting social science research on for and about women It develops an understanding of feminist research by introducing a range of feminist epistemologies methodologies and emergent methods that have had a significant impact on feminist research practice and women's studies scholarship Contributors to the Second Edition continue to highlight the close link between feminist research and social change and transformation The new edition expands the base of scholarship into new areas with 12 entirely new chapters on topics such as the natural sciences social work the health sciences and environmental studies It extends discussion of the intersections of race class gender and globalization as well as transgender transsexualism and the queering of gender identities All 22 chapters retained from the first edition are updated with the most current scholarship including a focus on the role that new technologies play in the feminist research process

Losing Our Minds Deborah L. Ruf, 2005 Wouldn't it be a disgrace if we lost the brightest students now attending our nation's schools Dr Deborah L Ruf establishes that there are far more highly gifted children than previously imagined yet large numbers of very bright children are never discovered by their schools Using 78 gifted and highly gifted children as her examples she illustrates five levels of giftedness Parents will be able to estimate which of the five levels of giftedness their child fits by comparing their own child's developmental milestones to those of the children described in the book This book contains practical advice for parents including how to find a school that works for your child Book jacket

Positive Conflict Darby Checketts, 2007-09-17 Conflict is a central theme of our lives We see the negative consequences of war and violence all around us Even in the workplace disputes and arguments cause problems and stifle productivity But opposition can also be positive For instance our muscles become stronger as they encounter resistance The bonds of our relationships can become stronger as we strive to overcome our differences Likewise says author Darby Checketts businesses and organizations can become stronger as a result of conflict Postive Conflict is a book that goes beyond coping with or handling workplace conflict its premise is that conflict is often an indicator that creative energy is about to be unleashed There is potentially positive power inside opposition just as with the fusion of atoms When opposing ideas are openly explored a breakthrough in thinking can occur which can reveal more comprehensive solutions And the coming together of these once opposing forces multiplies the potential for success If our view of conflict transcends a win lose mentality we will see that the flipside of opposition is the opportunity for discovery and innovation And in business today we need leaders who can reconcile the seeming exclusivity of competing ideas and fuse them for new and better results For example it is the combination of self confidence and humility that maximizes a leader's effectiveness By reading Postive Conflict you will Recognize the creative energy inside conflict to unleash the power of opposites Discover why the optimist's answer to everything is yes that the issue is not what is right or wrong but how to synthesize ideas to expand problem solving options Help your stakeholders come together in a spirit of partnership to move beyond special interests and personality clashes Understand that your own conflicting ideas and viewpoints reveal new dimensions of who you are and the range of opportunities that await you

Improving Learning in Secondary Schools Kenneth Ndifor Tangie, 2015-09-10 Improving Learning in Secondary Schools brings together in a succinct comprehensive and thought provoking manner several dimensions of classroom assessment feedback in one volume It is based on the principle that students need feedback on their work and conduct at school in order to be able to correct misconceptions and omissions that can render them incapable of making progress and learning in a given subject The book reports on a doctoral

study that examined teachers feedback practice and its relation to student learning in secondary schools It presents a critical fine grained classification and analysis of positive neutral and negative feedback categories in teacher talk and writing which could generate a globally applicable typology and theory of classroom feedback For some time now formative assessment generated feedback has been widely recommended for classrooms thanks mainly to compelling research based evidence showing the relative merits of formative assessment types over more traditional summative assessment practices In this book it is suggested that the time has come to depart from such arguments because the mere presence of feedback in teacher talk and writing be it formative or summative is not enough to support learning Feedback like formal and informal instruction and assessment is not mediated in vacuo it is a social process taking place in a social setting conducted by on and for social actors One must also consider the context especially the linguistic and socio cultural environment in which assessment feedback and learning occur but which also acts as a barrier and facilitator to successful feedback provision and uptake This argument should constitute a starting point for reflection debate and research into the effectiveness for learning of classroom assessment feedback Therefore whilst complementing previous work on this subject this book makes significant additions to a very important aspect of school life Primary and secondary school teachers university students academics and researchers as well as educationists and policy makers in the domain of educational assessment will find in it an inseparable companion and resource tool
