River Flow 2016 George Constantinescu, Marcelo Garcia, Dan Hanes, 2016-06-22 Understanding and being able to predict fluvial processes is one of the biggest challenges for hydraulics and environmental engineers hydrologists and other scientists interested in preserving and restoring the diverse functions of rivers The interactions among flow turbulence vegetation macroinvertebrates and other organisms as well as the transport and retention of particulate matter have

important consequences on the ecological health of rivers Managing rivers in an ecologically friendly way is a major component of sustainable engineering design maintenance and restoration of ecological habitats To address these challenges a major focus of River Flow 2016 was to highlight the latest advances in experimental computational and theoretical approaches that can be used to deepen our understanding and capacity to predict flow and the associated fluid driven ecological processes anthropogenic influences sediment transport and morphodynamic processes River Flow 2016 was organized under the auspices of the Committee for Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Since its first edition in 2002 the River Flow conference series has become the main international event focusing on river hydrodynamics sediment transport river engineering and restoration Some of the highlights of the 8th International Conference on Fluvial Hydraulics were to focus on inter disciplinary research involving among others ecological and biological aspects relevant to river flows and processes and to emphasize broader themes dealing with river sustainability River Flow 2016 extended abstract book 854 pages full paper CD ROM 2436 pages contains the contributions presented during the regular sessions covering the main conference themes and the special sessions focusing on specific hot topics of river flow research and will be of interest to academics interested in hydraulics hydrology and environmental engineering *Proceedings of the First Southern African Geotechnical Conference* S.W.

The State of the Art in Student Engagement Carl

Senior, 2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this

has been achieved However students may also use existing social networks such as friendship groups as a mechanism for learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector *Come Fly with Us* Melvin Croft, John

Youskauskas, 2019-02 2020 Space Hipsters Prize for Best Book in Astronomy Space Exploration or Space History *Come Fly with Us* is the story of an elite group of space travelers who flew as members of many space shuttle crews from pre Challenger days to Columbia in 2003 Not part of the regular NASA astronaut corps these professionals known as payload specialists came from a wide variety of backgrounds and were chosen for an equally wide variety of scientific political and national security reasons Melvin Croft and John Youskauskas focus on this special fraternity of spacefarers and their individual reflections on living and working in space Relatively unknown to the public and often flying only single missions these payload specialists give the reader an unusual perspective on the experience of human spaceflight The authors also bring to light NASA's struggle to integrate the wide ranging personalities and professions of these men and women into the professional astronaut ranks While *Come Fly with Us* relates the experiences of the payload specialists up to and including the Challenger tragedy the authors also detail the later high profile flights of a select few including Barbara Morgan John Glenn who returned to space at the age of seventy seven and Ilan Ramon of Israel aboard Columbia on its final fatal flight STS 107 *Intimate Relationships across the Lifespan* Abdul Khaleque, 2018-02-08 This comprehensive research based book is a next generation study of intimate relationships that explores implications for health and well being across cultures genders and traditional as well as non traditional relationships This book fills the need for a contemporary analysis of intimate relationships and their implications for people's health well being and quality of life It covers topics not ordinarily included in textbooks on this topic in non traditional areas such as LGBT relationships The text also addresses intervention strategies for relationship problems and offers tools and techniques for assessing intimate relationships Chapters are organized to present information about the origin formation development enrichment and maintenance of intimate relationships in a way that allows readers to build upon what they have learned The text provides integrated and evidence based information on almost all aspects of intimate relationships and will be of interest to undergraduate and graduate students as well as faculty in family studies psychology and other social sciences Moreover counselors clinicians and therapists working on conflict violence abuse maladjustment depression deterioration dissolution reconstruction and enrichment of marital and non marital intimate relationships will find this text valuable for their practice *Child and*

Adolescent Development for Educators Christi Crosby Bergin, David Allen Bergin, Sue Walker, Graham Daniel, Angela Fenton, Pearl Subban, 2018-09-01 Child and Adolescent Development for Educators covers development from early childhood through high school This text provides authentic research based strategies and guidelines for the classroom helping future teachers to create an environment that promotes optimal development in children The authors apply child development concepts to topics of high interest and relevance to teachers including classroom discipline constructivism social emotional development and many others Child and Adolescent Development for Educators combines the core theory with practical implications for educational contexts and shows how child development links to the Australian Professional Standards for Graduate Teachers Case studies and real world vignettes further bridge the distance between research and the classroom Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children **Science Education in the Arab Gulf States** Nasser Mansour, Saeed
