Harris, 2023-06-22 The present volume of Time and Science series is devoted to Physical Sciences and Cosmology Today more than ever the question is Time an ontological property a necessary ingredient for the physical description of the world or a purely epistemological element relative to our situation in the world worry physicists and cosmologists alike For many of them Relativity and particularly General Relativity as well as its reconciliation with quantum mechanics in the elaboration of a quantum theory of gravitation points to a negative answer to the first alternative and leads them to deny the objective reality of time For others the answer is nuanced by the evidence of an emerging temporal property when one climbs the scales of the complexity of systems and or the applicability of the statistical laws of thermodynamics But for some the illusion of the unreality of time comes from certain confusions that they denounce and plead for the re establishment of time at the heart of physical theories **Space Studies Board Annual Report 2013** National Research Council, Division on

Smith,2016-02-17 Over recent decades an increasing amount of attention has been paid to identifying and meeting the individual support needs of mental health service users and people with physical impairments in the UK Evidence of this can be seen within the literature that considers mental health and physical impairment from a wide range of perspectives as well as the increased range of service provision for individuals within both categories However the support needs of individuals who fall into both categories have largely been overlooked by social care and health service providers practitioners and organisations for whom the main focus is either mental health or physical impairment The lack of attention that has been given in theory and in practice to the mental health support needs of disabled women who experience mental distress has resulted in an insufficient knowledge base of how to support disabled women who may require some form of mental health support For this group of women this has meant that their needs have arguably continued to be neglected and subsequently left unmet Writing from her position as both a social worker and a service user Julia Smith has written an innovative and important text which both discusses a neglected area of personal experience and makes an original contribution to knowledge with regard to both policy and

Climate Change Adaptation and Development Tor Håkon Inderberg, Siri Eriksen, Karen O'Brien, Linda Sygna, 2014-11-20 Climate change poses multiple challenges to development It affects lives and livelihoods infrastructure and institutions as well as beliefs cultures and identities There is a growing recognition that the social dimensions of vulnerability and adaptation now need to move to the forefront of development policies and practices This book presents case studies showing that climate change is as much a problem of development as for development with many of the risks closely linked to past present and future development pathways Development policies and practices can play a key role in addressing climate change but it is critical to question to what extent such actions and interventions reproduce rather than address the social and political structures and development pathways driving vulnerability The chapters emphasise that adaptation is about much more than a set of projects or interventions to reduce specific impacts of climate change it is about living with change while also transforming the processes that contribute to vulnerability in the first place This book will help students in the field of climate change and development to make sense of adaptation as a social process and it will provide practitioners policymakers and researchers working at the interface between climate change and development with useful insights for approaching adaptation as part of a larger transformation to sustainability
