Directions: Circle the term that correctly completes each sentence.

1. The wavelength of a transverse wave is often measured from (crest to crest, crest to trough).
2. Waves with greater amplitudes carry (more, less) energy than waves with smaller amplitudes.
3. The amplitude of a wave can be measured from the (medium, crest) or the (trough, wavelength) to the rest position of the wave's medium.
4. The number of waves that pass a point in one (second, minute) is the wave's (amplitude, frequency).
5. Waves with longer wavelengths have a (lower, higher) frequency and waves with shorter wavelengths have a (lower, higher) frequency.
6. A group of molecules that are squeezed together is called a (rarefaction, compression).
7. Electromagnetic waves travel faster in (gases, solids).

Directions: Use the words below to label the diagram. You will use each term more than once. Then answer the questions.

in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science
Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science
the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for
science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science
Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also
grouped by type core materials supplementary units and science activity books Each annotation of curriculum material
includes a recommended grade level a description of the activities involved and of what students can be expected to learn a
list of accompanying materials a reading level and ordering information The curriculum materials included in this book were
selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and
incorporate goals and principles of the National Science Education Standards The annotations designate the specific content
standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of
diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and
multimedia programs chapters on books about science and teaching directories and guides to science trade books and
periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science

circle of readers to which it hopes to appeal and the author s purpose in writing it have been set out in the Preface to the first

German edition published in 1948 The present book consistently follows the principles of the theory of quantities the beginnings of which date back to James C Maxwell This means that in all equations in this book the symbols invariably stand for physical quantities and not for the numerical values of quantities Only then are the equations generally valid and independent of the choice of units used in their evaluation The units used are always the metric units which have been gaining ground increasingly also in the English speaking countries A conversion table for some of the more important Anglo American units is given on page XIV I would like to record my sincere gratitude to Mr Ewald Osers for his pains taking work in making this translation and to Mr P C Banbury Ph D of the Department of Physics University of Reading England both for the advice he has given him throughout and for devising the problems specially for this edition *Science Abstracts* ,1925
