Physical Sciences Gauteng Prelim 2013:

Quaternary Environmental Change in Southern Africa Jasper Knight, Stefan W. Grab, 2016-06-23 This book provides a benchmark study of southern African landscape evolution during the Quaternary for researchers professionals and policymakers

Towards applying a green infrastructure approach in the Gauteng City-Region Christina Culwick, Samkelisiwe Khanyile, Kerry Bobbins, Stuart Dunsmore, Anne Fitchett, Lerato Monama, Raishan Naidu, Gillian Sykes, Jennifer van den Bussche, Marco Vieira, 2019-12-11 In the context of heightened climate variability thinking about ways to redesign our urban areas with more sustainable infrastructure solutions is becoming more and more important Green infrastructure GI is emerging as an alternative approach to traditional grey infrastructure in urban planning and development Its emergence can be understood in terms of the growing demand for infrastructure and services increased concerns over natural resource constraints and climate change and the negative impacts associated with traditional approaches to designing and building cities It has been proposed that GI can provide the same services as traditional infrastructure at a similar capital cost while also providing a range of additional benefits However despite the increasing examples of successful urban GI applications traditional infrastructure continues to dominate due to the lack of systematic evidence to support GI implementation As a result there has been an increase in calls from policy and decision makers for a greater evidence base on the benefits of GI as well as for practical guidelines on its implementation Towards applying a green infrastructure approach in the Gauteng City Region is the GCRO s third report in its ongoing research into Green assets and infrastructure The first two reports in this project series were more theoretically grounded and policy oriented whereas this third report is more practical in nature The first report explored the basic principles around GI assessed the extent of ecological features in Gauteng and the way governments in the province think about planning and maintenance of green assets The second report responded to some of the challenges identified in the first report and in particular the importance of government officials and practitioners in exploring how international green infrastructure plans could be applied in the Gauteng context This third report builds on the findings of the aforementioned reports and the project s CityLab series which highlighted the need to build an evidence base as critical for garnering support for and as well as enhancing investment in the GI approach Unlike the more theoretically grounded earlier reports this report comprises four technical sections and practical reflections on how a GI approach could be incorporated into urban planning in the GCR and in other similar urban contexts

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17 This handbook showcases an Africa wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent The focal time spans the Pleistocene Epoch c 2 5 million 11 700 years ago during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities a large brain relative to body size language

and social complexity developed in the general forms that they are found today The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by Collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology Providing reference datasets for teaching and researching African prehistory Making Africa s Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order A number of those site related entries examine multiple archaeological localities lumped under specific projects or study areas The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating field data recovery lithic analysis micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa The introductory chapter provides an historical overview of the development of Stone Age Paleolithic archaeology in Africa beginning in the mid 19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent s Pleistocene record By making a good amount of African Stone Age literature accessible to researchers and the public we wish to promote interest in human evolutionary research in the continent and elsewhere Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists

A Fossil History of Southern African Land Mammals D. Margaret Avery, 2019-04-11 A comprehensive reference on the taxonomy and distribution in time and space of all currently recognized southern African fossil mammals This title is also available as Open Access on Cambridge Core

Fault Lines Jonathan Jansen, Cyril Walters, 2020-03-31 What is the link if any between race and disease How did the term baster as mixed race come to be mistranslated from incest in the Hebrew Bible What are the roots of racial thinking in South African universities How does music fall on the ear of black and white listeners Are new developments in genetics simply a backdoor for the return of eugenics For the first time leading scholars in South Africa from different disciplines take on some of these difficult questions about race science and society in the aftermath of apartheid This book offers an important foundation for students pursuing a broader education than what a typical degree provides and a must read resource for every citizen concerned about the lingering effects of race and racism in South Africa and other parts of the world

The Paleobiology of Australopithecus Kaye E. Reed, John G Fleagle, Richard E Leakey, 2013-03-15 Australopithecus species have been the topic of much debate in palaeoanthropology since Raymond Dart described the first species Australopithecus africanus in 1925 This volume synthesizes the geological and paleontological context of the species in East and South Africa covers individual sites such as Dikika Hadar Sterkfontein and Malapa debates the alpha taxonomy of some of the species and addresses questions regarding the movements of the species across the continent Additional chapters discuss the genus in terms of sexual dimorphism diet reconstruction using microwear and isotopic methodologies postural and locomotor behavior and ontogeny

Hominin

Postcranial Remains from Sterkfontein, South Africa, 1936-1995 Bernhard Zipfel, Brian G. Richmond, Carol V.

Ward, 2020-05-07 The 1924 African discovery of an early hominin child's skull referred to as *Australopithecus africanus* by Raymond Dart was a major event in the history of paleoanthropology. This provided the first evidence of early hominins in Africa and overturned conventional ideas about human evolution. Subsequent discoveries of *A. africanus* fossils notably from cave deposits at Sterkfontein yielded the first evidence that early hominins were habitual bipeds. Fifty years after this the discovered wealth of fossil evidence in eastern Africa of the slightly older and craniodentally more primitive taxon *A. afarensis* catalyzed debates about the origin and evolution of human gait and the phylogenetic relationships among early hominins. This formed the main basis of our understanding of early hominin bipedality and paleobiology. Little attention has been paid to the variation among species in postcranial anatomy and locomotion although intriguing hints are beginning to appear in the literature. Did multiple varieties of bipedality evolve? Did australopithecine species differ in positional or manipulative abilities, body proportions or patterns of sexual dimorphism? These are critical questions for understanding the evolution of australopithecines and hominin locomotion. In this book Bernhard Zipfel, Brian Richmond, Carol Ward and the most knowledgeable scholars in their respective fields provide groundbreaking accounts for each postcranial fossil and expert examinations into the background of each fossil. The chapters include standardized high quality photographs and anatomical descriptions to allow readers to read the book entirely or learn by comparing features across chapters. **Hominin Postcranial Remains from Sterkfontein, South Africa, 1936-1995** is an evolutionary history of South African hominins and it offers readers an orientation and introduction to the field. This is an important reference book for professional paleontologists, paleobiologists, anthropologists, geologists, students and historians interested in human evolution. **African Paleoecology and Human Evolution**

Sally C. Reynolds, René Bobe, 2022-06-09 A comprehensive account of hominin fossil sites across Africa including the environmental and ecological evidence central to our understanding of human evolution. Rough and Tumble Travis Rayne Pickering, 2013-04-10 Travis Rayne Pickering argues that the advent of ambush hunting approximately two million years ago marked a milestone in human evolution, one that established the social dynamic that allowed our ancestors to expand their range and diet. He challenges the traditional link between aggression and human predation, however, claiming that while aggressive attack is a perfectly efficient way for our chimpanzee cousins to kill prey, it was a hopeless tactic for early human hunters who, in comparison to their large potentially dangerous prey, were small, weak and slow-footed. Technology that evolved from wooden spears to stone-tipped spears and ultimately to the bow and arrow increased the distance between predator and prey and facilitated an emotional detachment that allowed hunters to stalk and kill large game. Based on studies of humans and of other primates as well as on fossil and archaeological evidence, Rough and Tumble offers a new perspective on human evolution by decoupling ideas of aggression and predation to build a more realistic understanding of what it is to be human.
