Physical Sciences Paper 1 2013 September:

Can Science Fix Climate Change? Mike Hulme, 2014-06-04 Climate change seems to be an insurmountable problem Political solutions have so far had little impact Some scientists are now advocating the so called Plan B a more direct way of reducing the rate of future warming by reflecting more sunlight back to space creating a thermostat in the sky In this book Mike Hulme argues against this kind of hubristic techno fix Drawing upon a distinguished career studying the science politics and ethics of climate change he shows why using science to fix the global climate is undesirable ungovernable and unattainable Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks improving regional air quality and driving forward an energy technology transition Seeking to reset the planet's thermostat is not the answer

The End of Doom Ronald Bailey, 2015-07-21 In the past five decades there have been many many forecasts of impending environmental doom They have universally been proven wrong Meanwhile those who have bet on human resourcefulness have almost always been correct In his widely praised book *Ecoscience* Ronald Bailey strongly countered environmentalist alarmism using facts to demonstrate just how wildly overstated many claims of impending ecological doom really were Now twenty years later the Reason Magazine science correspondent is back to assess the future of humanity and the global biosphere Bailey finds contrary to popular belief that many present ecological trends are quite positive Including Falling cancer incidence rates in the United States The likelihood of a declining world population by mid century The abundant return of agricultural land to nature as the world reaches peak farmland A proven link between increases in national wealth and reductions in air and water pollution Global warming is a problem but the cost of clean energy could soon fall below that of fossil fuels In *The End of Doom* Bailey avoids polemics and offers a balanced fact based and ultimately hopeful perspective on our current environmental situation Now isn't that a breath of fresh air

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants *The Secure and the Dispossessed* looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection

greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures

While the great scientists of the past recognized a need for a multidisciplinary approach today s schools often treat math and science as subjects separate from the rest This not only creates a disinterest among students but also a potential learning gap once students reach college and then graduate into the workforce Cases on Research Based Teaching Methods in Science Education addresses the problems currently facing science education in the USA and the UK and suggests a new hands on approach to learning This book is an essential reference source for policymakers academicians researchers educators curricula developers and teachers as they strive to improve education at the elementary secondary and collegiate levels

Application of FPGA to Real-Time Machine Learning Piotr Antonik,2018-05-18 This book lies at the interface of machine learning a subfield of computer science that develops algorithms for challenging tasks such as shape or image recognition where traditional algorithms fail and photonics the physical science of light which underlies many of the optical communications technologies used in our information society It provides a thorough introduction to reservoir computing and field programmable gate arrays FPGAs Recently photonic implementations of reservoir computing a machine learning algorithm based on artificial neural networks have made a breakthrough in optical computing possible In this book the author pushes the performance of these systems significantly beyond what was achieved before By interfacing a photonic reservoir computer with a high speed electronic device an FPGA the author successfully interacts with the reservoir computer in real time allowing him to considerably expand its capabilities and range of possible applications Furthermore the author draws on his expertise in machine learning and FPGA programming to make progress on a very different problem namely the real time image analysis of optical coherence tomography for atherosclerotic arteries

Educational Assessment Christine Harrison,Constant Leung,David Pepper,2023-10-19 This book explores and builds on the extraordinary work of Professor Paul Black across assessment and pedagogy across the curriculum including STEM humanities and social science subjects This book explores the influence that Black has had within educational settings focusing on interpretations of the work and scholarship he has achieved across a range of settings and on the ways scholars who have worked with him or been influenced by his ideas have developed their research and teaching The contributions are presented under three thematic sections each of which reflects a set of shared educational concerns and values drawing on the natural and social sciences and developments in public policy These concerns and values with their emphasis on teacher assessment provide a basis for a strategic informed and coherent response to challenges in education such as the cancellation of public examinations in the face of the Covid 19 pandemic
