Kenneth J. Luterbach, 2022-05-12. Creating Stellar Lessons with Digital Tools prepares teachers in training and in service to use technologies for design and development activities with middle and high school students. While software, open resources, handheld devices, and other tools hold great potential to enhance learning experiences, teachers themselves must model technology use in ways that inspire students to become producers and leaders rather than consumers and followers. Featuring concrete applications in social studies, English, mathematics, and science scenarios, this book provides pre-service and in-service teachers with seven paths to creatively integrate and innovate with computational thinking, datasets, maker spaces, visual design, media editing, and other approaches.

Handbook of Wood Science and Technology
Peter Niemz, Alfred Teischinger, Dick Sandberg, 2023-04-01. This handbook provides an overview on wood science and technology of unparalleled comprehensiveness and international validity. It describes the fundamental wood biology, chemistry, and physics, as well as structure-property relations of wood and wood-based materials. The different aspects and steps of wood processing are presented in detail from both a fundamental technological perspective and their realisation in industrial contexts. The discussed industrial processes extend beyond sawmilling and the manufacturing of adhesively bonded wood products to the processing of the various wood-based materials, including pulp and paper, natural fibre materials, and aspects of bio-refinery. Core concepts of wood applications, quality, and life cycle assessment of this important natural resource are presented. The book concludes with a useful compilation of fundamental material parameters and data, as well as a glossary of terms in accordance with the most important industry standards. Written and edited by a truly international team of experts from academia, research institutes, and industry, thoroughly reviewed by external colleagues, this handbook is well attuned to educational demands, as well as providing a

summary of state of the art research trends and industrial requirements It is an invaluable resource for all professionals in research and development and engineers in practise in the field of wood science and technology
