Self-Directed Learning Elsa Mentz, Dorothy Laubscher, Jako Olivier, 2021-12-31 This book on self directed learning SDL is devoted to original academic scholarship within the field of education and is the 6th volume in the North West University NWU SDL book series In this book the authors explore how self directed learning can be considered an imperative for

education in a complex modern society Although each chapter represents independent research in the field of self directed learning the chapters form a coherent contribution concerning the scholarship of self directed learning and specifically the effect of environmental and praxis contexts on the enhancement of self directed learning in a complex society The publication as a whole provides diverse perspectives on the importance of self directed learning in varied contexts Scholars working in a wide range of fields are drawn together in this scholarly work to present a comprehensive dialogue regarding self directed learning and how this concept functions in a complex and dynamic higher education context This book presents a combination of theory and practice which reflects selected conceptual dimensions of self directed learning in society as well as research based findings pertaining to current topical issues relating to implementing self directed learning in the modern world The varied methodologies provide the reader with different and balanced perspectives as well as varied and innovative ideas on how to conduct research in the field of self directed learning Motivation, Leadership and Curriculum Design

Caroline Koh, 2015-01-06 This book discusses the links between the basis of motivational leadership and curricular constructs with regards to 21st century and net generation learning It brings together recent developments in motivation educational leadership and curriculum design in order to offer a better understanding of what is already known and what is yet to be explored in these fields It consists of a collection of findings on recent educational developments including topics such as motivating the 21st century learner leadership practices and influences curriculum design and models novel learning environments and 21st century learners and their needs **The State of the Art in Student Engagement** Carl

Senior, 2015-07-10 There is an extensive literature conducted from a range of theoretical perspectives and methodologies on the role of groups and student learning in higher education However here the concept of the group is heavily contested at a theoretical level but within higher education practice characterizing the group has tended to be clear cut Groups of students are often formed within the parameters of specific educational programs to address explicitly defined learning objectives These groups are often small scale and achieve tasks through cooperative or collaborative learning Cooperative learning involves students dividing roles and responsibilities between group members so learning becomes an independent process and outcome On the other hand collaborative learning involves students working together by developing shared meanings and knowledge to solve a task or problem From this perspective learning is conceptualized as both a social process and individual outcome That is collaborative learning may facilitate individual student conceptual understanding and hence lead to higher academic achievement The empirical evidence is encouraging as has been shown that students working collaboratively tend to achieve higher grades than students working independently However the above perspectives on student engagement assume that groups are formed within the confines of formal learning environments e g lecture theaters involve students on the same degree program have the explicit function of achieving a learning task and disband once this has been achieved However students may also use existing social networks such as friendship groups as a mechanism for

learning which may occur outside of formal learning environments There is an extensive literature on the role and benefits of friendship groups on student learning within primary and secondary education but there is a distinct lack of research within higher education This ebook is innovative and ambitious and will highlight and consolidate the current understanding of the role that student based engagement behaviors may serve in effective pedagogy A unique aspect of this research topic will be the fact that scholars will also be welcome to submit articles that describe the efficacy of the full range of approaches that have been employed to facilitate student engagement across the sector

Child and Adolescent Development for Educators Christi Crosby Bergin, David Allen Bergin, Sue Walker, Graham Daniel, Angela

Fenton, Pearl Subban, 2018-09-01 *Child and Adolescent Development for Educators* covers development from early childhood through high school. This text provides authentic research based strategies and guidelines for the classroom helping future teachers to create an environment that promotes optimal development in children. The authors apply child development concepts to topics of high interest and relevance to teachers including classroom discipline, constructivism, social emotional development and many others. *Child and Adolescent Development for Educators* combines the core theory with practical implications for educational contexts and shows how child development links to the Australian Professional Standards for Graduate Teachers. Case studies and real world vignettes further bridge the distance between research and the classroom. Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children.

Science Education in the Arab Gulf States Nasser Mansour, Saeed Al-Shamrani, 2015-04-27. The book introduces the development of science education in the Arab Gulf states and presents a critical analysis of current issues and concerns in educational research in science education. The key purpose is to provide some perspectives on the state of science education in Gulf and to share experiences with international scholars about the impact of the innovations and reforms implemented in science education in Arabian Gulf. But *Science Education in the Arab Gulf States* also intends to present new visions and to make suggestions and recommendations about the contribution of science education to prepare students in the knowledge age. The volume is organised into three main sections. The first section addresses the current practices and challenges in science education in some of the Arab Gulf states. This section sheds critically the light on the challenges and problems that hinder or constrain the implementation of innovations in science education. The second section analyses the science educational reforms and innovations that are being implemented in the Arabian Gulf. This section presents experiences and research with using new approaches to teaching and learning in science classrooms in some of the Arab Gulf states. The third section discusses the socio cultural issues that have impacted on shaping and reshaping the science education in the Arabian Gulf. This section focuses on exploring the socio cultural factors that influence engagement and non engagement in science education. It also explores how socio cultural issues and contexts guide the reform of science education in the Arabian Gulf and presents various examples of how we can respond to cultural issues.

Polar Shift: The Arctic Sustained Joseph F. C. DiMento, 2022-05-10. *Polar Shift* addresses how to sustain the Arctic's richness, beauty and local and global value. It describes programs specifically created to protect this region, the great inventory of law, policy and civil society activity targeting sustainability of the region. It presents the Arctic and its present environmental health very broadly understood and competing ideas of how it can be maintained or improved with specific recommendations. This is a book about the Arctic's past and how it was envisioned about its environment, its people and their cultures. *Polar Shift* describes how the changing of the Arctic matters and to whom. It discusses what is being done to address threats to the Arctic's environment and describes an inventory of tools available to sustain the Arctic and its people.
