Primary Science Education in East Asia Yew-Jin Lee, Jason Tan, 2018-09-26 This edited volume is a state of the art comparison of primary science education across six East Asian regions namely the People s Republic of China Republic of Korea Republic of China Hong Kong SAR Japan and Singapore While news of educational policies classroom teaching assessment and other educational innovations here often surface in the international media this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia Above all it is a readable yet comprehensive survey readers would have an accurate sense of what has been accomplished what has not worked so well and what remains to be done Invited experts in comparative education research and or science education also provide commentary by discussing common themes across the six regions These types of critical synoptic reviews add much value by enabling readers to understand broad commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts issues and policies Education in East Asia holds many lessons both positive and negative to offer to the rest of the world to which this volume is a timely contribution to the literature

Cognition across the psychiatric disorder spectrum: From mental health to clinical diagnosis Caroline Gurvich, Susan L. Rossell, 2015-08-31 Psychiatric symptoms are considered to be distributed along a continuum from good mental health to a diagnosable psychiatric disorder In the case of psychosis subclinical psychotic experiences which can include odd behaviors strange speech unusual perceptual experiences and social emotional withdrawal are often referred to as schizotypy Research

examining schizotypal traits in non clinical populations is rapidly expanding The exploration of schizotypy allows us to identify areas of overlap with psychiatric disorders schizophrenia and related disorders at genetic biological environmental and psychosocial levels thus identifying putative risk factors as well as exploring potentially protective factors Schizotypy is also a valuable model for exploring cognition as performance is not confounded by issues often present in schizophrenia samples such as long term antipsychotic medication usage social isolation and recurrent hospitalizations Investigating cognition is a particularly important area of research as cognitive symptoms in schizophrenia such as impaired attention reduced memory and difficulties with executive functions are a core feature of schizophrenia and strongly related to quality of life and functional outcomes yet generally respond poorly to current treatment options The aim of this special Research Topic is to explore the relationship between cognition schizotypy and the schizophrenia spectrum The articles in this e book draw on a variety of perspectives and represent an interesting array of opinions reviews and empirical studies that begin to answer questions about the similarities and overlaps between schizotypy and schizophrenia spectrum disorders contributing to our understanding of potential risk factors Equally important is research that highlights differences between schizotypy and schizophrenia spectrum disorders that may enhance our understanding of potentially protective or adaptive features of schizotypy Collectively these articles highlight the exploratory potential of the study of schizotypy particularly in relation to better understanding cognition across the schizophrenia spectrum

Child Development at the Intersection of Race and SES, 2019-07-02 Child Development at the intersection of Race and SES Volume 57 in the Advances in Child Development and Behavior series presents theoretical and empirical scholarship illuminating how race ethnicity and socioeconomic status intersect to shape children s development and developmental contexts Important chapters in this new release include the Implications of Intersecting Socioeconomic and Racial Identities for Academic Achievement and Well being The home environment of low income Latino children Challenges and opportunities Profiles of race ethnicity and socioeconomic status Implications for ethnic racial identity discrimination and sleep Youths sociopolitical perceptions and mental health Intersections between race class and gender and much more Rather than focusing on the additive effects of race ethnicity and SES which is typical and a limitation in the developmental literature the scholarship in this book considers how the factors and processes shaping the development of children of color can differ markedly across the socioeconomic continuum This collection illustrates how applying an intersectional lens to developmental science can yield unique insights into the challenges confronting and assets buoying both minority and majority children s healthy development
