UNIT 26: ELECTRICITY AND MAGNETISM

Occasionally during these years . . . [Michael Faraday] thought of electrical problems. One of special interest was the question: Since magnetism can be produced from electricity, can electricity be produced from magnetism? Everything in nature is nicely balanced and symmetrical; in the words of Newton, there is action and there is reaction. Force will give motion; motion will give force. Heat will cause pressure; pressure will cause heat. Chemical action will produce electricity; electricity will produce chemical action. Then, since electricity will develop magnetism, will not magnetism develop electricity?
