phrase structure and form Hearing Homophony investigates the elusive early history of tonality by examining a constellation of late Renaissance popular songs which flourished throughout Western Europe at the turn of the seventeenth century Megan Kaes Long argues that it is in these songs rather than in more ambitious secular and sacred works that the foundations of eighteenth century style are found Arguing that tonality emerges from features of modal counterpoint in particular the rhythmic phrase structural and formal processes that govern it and drawing on the arguments of theorists such as Dahlhaus Powers and Barnett she asserts that modality and tonality are different in kind and not mutually exclusive Using several hundred homophonic partsongs from Italy Germany England and France Long addresses a historical question of critical importance to music theory musicology and music performance Hearing Homophony presents not only a new model of tonality s origins but also a more comprehensive understanding of what tonality is providing novel insight into the challenging world of seventeenth century music
