Falls in Older Adults: Prevention and Risk Evaluation Tzvi Dwolatzky, 2023-10-16 Falls are a major health challenge and represent the leading cause of accidental death in older adults It is essential to identify those factors associated with an increased risk for falls and to develop specific programs for fall prevention The risk of falling can be assessed in older adults using different parameters including biological psychosocial socioeconomic behavioral and environmental factors For example the risk of falls increases when vision is impaired when sleep quality is poor or when mood is depressed Moreover physical parameters such as changes in body mass and blood pressure are risk factors for falls in older adults

Consequences of Growing Up Poor Greg J. Duncan, Jeanne Brooks-Gunn, 1997-06-19 One in five American children now live in families with incomes below the povertyline and their prospects are not bright Low income is statistically linked with a variety of poor outcomes for children from low birth weight and poor nutrition in infancy to increased chances of academic failure emotional distress and unwed childbirth in adolescence To address these problems it is not enough to know that money makes a difference we need to understand how *Consequences of Growing Up Poor* is an extensive and illuminating examination of the paths through which economic deprivation damages children at all stages of their development In *Consequences of Growing Up Poor* developmental psychologists economists and sociologists revisit a large body of studies to answer specific questions about how low income puts children at risk intellectually emotionally and physically Many of their investigations demonstrate that although income clearly creates disadvantages it does so selectively and in a wide variety of ways Low income preschoolers exhibit poorer cognitive and verbal skills because they are generally exposed to fewer toys books and other stimulating experiences in the home Poor parents also tend to rely on home based child care where the quality and amount of attention children receive is inferior to that of professional facilities In later years conflict between economically stressed parents increases anxiety and weakens self esteem in their teenaged children Although they share economic hardships the home lives of poor children are not homogenous *Consequences of Growing Up Poor* investigates whether such family conditions as the marital status education and involvement of parents mitigate the ill effects of poverty *Consequences of Growing Up Poor* also looks at the importance of timing Does being poor have a different impact on preschoolers children and adolescents When are children most vulnerable to poverty Some contributors find that poverty in the prenatal or early childhood years appears to be particularly detrimental to cognitive development and physical health Others offer evidence that lower income has a stronger negative effect during adolescence than in childhood or adulthood Based on their findings the editors and contributors to *Consequences of Growing Up Poor* recommend more sharply focused child welfare policies targeted to specific eras and conditions of poor children s lives They also weigh the relative need for income supplements child care subsidies and home interventions *Consequences of Growing Up Poor* describes the extent and causes of hardships for poor children defines the interaction between income and family and offers solutions to improve young lives JEANNE BROOKS
