Ignacio Del Valle was appointed encargo de justicias to preserve order in the mining district William H Davis says that from eighty to one hundred thousand dollars of gold was taken from these places in two years Colonel Mason in his report of August 17 1848 on the gold fields of California says The gold placer near the mission of San Fernando has long been known but has been but little wrought for want of water But the event that was to set the world ablaze and create an empire on the shores of the Pacific was the discovery by James W Marshall of gold on the American river January 24 1848 It may seem strange that in a community where the somewhat extensive placers of the San Fernando valley received so little attention a discovery of gold placers in the Sacramento valley should have created such intense excitement It may be that the reason for this was that the discovery on the American river was so quickly followed by reports of the great extent of the gold region and the astonishing richness of the placers The gold deposits were on or near the surface no capital was required to work them and a laboring man with nothing but his pick shovel and pan could obtain from one to two or more ounces per day with the possibility always of acquiring a fortune in a few weeks In the foothills of the sierras about forty five miles northeast of the Embarcadero of the Sacramento on the south fork of the American river Captain Sutter was building a sawmill in the fall and winter of 1847 and employed James W Marshall to superintend the work In digging a tail race for the mill Marshall was in the habit of turning the water into the ditch at night to wash out the dirt loosened by the workmen during the day
