preferred performance based qualifying credential for technical support and IT operational roles according to the organization that manages it CompTIA The Network certification focuses on the day to day work of an IT technician in a business environment One reason the Network certification receives respect by IT employers is that it is accredited by international organizations The ISO or International Standards Organization is a worldwide standard setting group headquartered in Geneva and ANSI the American National Standards Institute is the USA s representative to ISO CompTIA has been accredited by ANSI for compliance with the ISO standard that applies to operating a certification body or organization and CompTIA must maintain certain quality levels in order to maintain that accreditation That s a bit of background on CompTIA and the Network certification But who might benefit from this credential Well anyone wanting to be hired on by a company that requires it certainly but more broadly anybody pursuing a career in tech support for example as a help desk analyst service desk analyst or a desktop support technician Field service techs will also find the credential helpful as will those who aspire to being a network engineer or a documentation specialist in IT This book will help you prepare for the latest CompTIA Network Certification exam code N10 008 BUY THIS BOOK NOW AND GET STARTED TODAY In this book you will discover Network Concepts and Protocols CompTIA Network Exam Information OSI Model Network Operations Encapsulation and the OSI Model Network Protocols and Port Numbers DHCP DNS NTP SQL Database Protocols TCP UDP Protocols Binary and Hexadecimal Numbers How to Convert Decimal to Binary IPv4 Addressing Fundamentals Classless Classfull Addressing IP Address Types How to Subnet Networks IPv6 Address Fundamentals IPv6 SLAAC IPv6 DHCP Network Address Translation Dynamic Host Configuration Protocol Domain Name System and more BUY THIS BOOK NOW AND GET STARTED TODAY
