Agrachev,D. Barilari,L. Rizzi,2019-01-08 The

curvature discussed in this paper is a far reaching generalization of the Riemannian sectional curvature The authors give a unified definition of curvature which applies to a wide class of geometric structures whose geodesics arise from optimal control problems including Riemannian sub Riemannian Finsler and sub Finsler spaces Special attention is paid to the sub Riemannian or Carnot Carath odory metric spaces The authors construction of curvature is direct and naive and similar to the original approach of Riemann In particular they extract geometric invariants from the asymptotics of the cost of optimal control problems Surprisingly it works in a very general setting and in particular for all sub Riemannian spaces Coercive Care Bernadette Mcsherry,Ian Freckelton,2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adult s care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition

Wanhill, 2016-11-07 This book serves as a comprehensive resource on various traditional advanced and futuristic material technologies for aerospace applications encompassing nearly 20 major areas Each of the chapters addresses scientific principles behind processing and production production details equipment and

facilities for industrial production and finally aerospace application areas of these material technologies The chapters are authored by pioneers of industrial aerospace material technologies This book has a well planned layout in 4 parts The first part deals with primary metal and material processing including nano manufacturing The second part deals with materials characterization and testing methodologies and technologies The third part addresses structural design Finally several advanced material technologies are covered in the fourth part Some key advanced topics such as Structural Design by ASIP Damage Mechanics Based Life Prediction and Extension and Principles of Structural Health Monitoring are dealt with at equal length as the traditional aerospace materials technology topics This book will be useful to students researchers and professionals working in the domain of aerospace materials

Explorer Lisle A. Rose, 2013-06-29 Danger was all that thrilled him Dick Byrd's mother once remarked and from his first pioneering aviation adventures in Greenland in 1925 through his daring flights to the top and bottom of the world and across the Atlantic Richard E Byrd dominated the American consciousness during the tumultuous decades between the world wars He was revered more than Charles Lindbergh deliberately exploiting the public's hunger for vicarious adventure Yet some suspected him of being a poseur and a handful reviled him as a charlatan who claimed great deeds he never really accomplished Then he overreached himself foolishly choosing to endure a blizzard lashed six month polar night alone at an advance weather observation post more than one hundred long miles down a massive Antarctic ice shelf His ordeal proved soul shattering his rescue one of the great epics of polar history As his star began to wane enemies grew bolder and he struggled to maintain his popularity and political influence while polar exploration became progressively bureaucratized and militarized Yet he chose to return again and again to the beautiful hateful haunted secret land at the bottom of the earth claiming not without justification that he was Mayor of this place Lisle A Rose has delved into Byrd's recently available papers together with those of his supporters and detractors to present the first complete balanced biography of one of recent history's most dynamic figures Explorer covers the breadth of Byrd's astonishing life from the early days of naval aviation through his years of political activism to his final efforts to dominate Washington's growing interest in Antarctica Rose recounts with particular care Byrd's two privately mounted South Polar expeditions bringing to bear new research that adds considerable depth to what we already know He offers views of Byrd's adventures that challenge earlier criticism of him including the controversy over his claim to being the first to have flown over the North Pole in 1926 and shows that the critics' arguments do not always mesh with historical evidence Throughout this compelling narrative Rose offers a balanced view of an ambitious individual who was willing to exaggerate but always adhered to his principles a man with a vision of himself and the world that inspired others who cultivated the rich and famous and who used his notoriety to espouse causes such as world peace Explorer paints a vivid picture of a brilliant but flawed egoist offering the definitive biography of the man and armchair adventure of the highest order

Biofeedback and Sports Science J.H. Sandweiss, S.L. Wolf, 2013-06-29 There is a new breed of athletic coach in the

educational arena While on speaking engagements around the world I've encouraged coaches to jump head first and quickly into sports science The reason is simple With new electronic communication systems coming on the market almost daily athletes can get valid and reliable information to help them maximize sports skills and this information can come faster than most coaches are able to deliver Coaches have historically rejected most sports science efforts in favor of traditional seat of the pants systems but now there is a new kind of athlete who is asking questions never before presented to the coach Professional athletes are individually seeking out sports scientists for answers to their particular problems Stories appear daily in the media about athletes making quantum jumps in performance as a result of their association with sports scientists The tidal wave is building and no one can stop it not even the sporting goods industry High tech athletic equipment is now a must in nearly every sport Large sporting goods companies have nearly gone bankrupt because of competitors new high tech products ix X FoREWORD The tail is wagging the dog Professional amateur and weekend athletes alike are demanding technical answers of our sports leaders and they are going elsewhere if the correct answers aren't available The number of Olympic athletes visiting our Coto Research Center in California is staggering
