*Explorer* Lisle A. Rose, 2013-06-29 Danger was all that thrilled him Dick Byrd's mother once remarked and from his first pioneering aviation adventures in Greenland in 1925 through his daring flights to the top and bottom of the world and across the Atlantic Richard E Byrd dominated the American consciousness during the tumultuous decades between the world wars He was revered more than Charles Lindbergh deliberately exploiting the public's hunger for vicarious adventure Yet some suspected him of being a poseur and a handful reviled him as a charlatan who claimed great deeds he never really accomplished Then he overreached himself foolishly choosing to endure a blizzard lashed six month polar night alone at an advance weather observation post more than one hundred long miles down a massive Antarctic ice shelf His ordeal proved soul shattering his rescue one of the great epics of polar history As his star began to wane enemies grew bolder and he struggled to maintain his popularity and political influence while polar exploration became progressively bureaucratized and militarized Yet he chose to return again and again to the beautiful hateful haunted secret land at the bottom of the earth claiming not without justification that he was Mayor of this place Lisle A Rose has delved into Byrd's recently available papers together with those of his supporters and detractors to present the first complete balanced biography of one of recent history's most dynamic figures *Explorer* covers the breadth of Byrd's astonishing life from the early days of naval aviation through his years of political activism to his final efforts to dominate Washington's growing interest in Antarctica Rose recounts with particular care Byrd's two privately mounted South Polar expeditions bringing to bear new research that adds considerable depth to what we already know He offers views of Byrd's adventures that challenge earlier criticism of him including the controversy over his claim to being the first to have flown over the North Pole in 1926 and shows that the critics' arguments do not always mesh with historical evidence Throughout this compelling narrative Rose offers a balanced view of an ambitious individual who was willing to exaggerate but always adhered to his principles a man with a vision of himself and the world that inspired others who cultivated the rich and famous and who used his notoriety to espouse causes such as world peace *Explorer* paints a vivid picture of a brilliant but flawed egoist offering the definitive biography of the man and armchair adventure of the highest order

*Biofeedback and Sports Science* J.H.

Sandweiss, S.L. Wolf, 2013-06-29 There is a new breed of athletic coach in the educational arena. While on speaking engagements around the world I've encouraged coaches to jump head first and quickly into sports science. The reason is simple. With new electronic communication systems coming on the market almost daily, athletes can get valid and reliable information to help them maximize sports skills, and this information can come faster than most coaches are able to deliver. Coaches have historically rejected most sports science efforts in favor of traditional seat-of-the-pants systems, but now there is a new kind of athlete who is asking questions never before presented to the coach. Professional athletes are individually seeking out sports scientists for answers to their particular problems. Stories appear daily in the media about athletes making quantum jumps in performance as a result of their association with sports scientists. The tidal wave is building and no one can stop it, not even the sporting goods industry. High tech athletic equipment is now a must in nearly every sport. Large sporting goods companies have nearly gone bankrupt because of competitors' new high tech products. ix X FOREWORD The tail is wagging the dog. Professional, amateur, and weekend athletes alike are demanding technical answers of our sports leaders, and they are going elsewhere if the correct answers aren't available. The number of Olympic athletes visiting our Coto Research Center in California is staggering.
