Library and Information Services Division, 1977 [The World of Niagara Wine](#) Michael Ripmeester, Phillip Gordon Mackintosh, Christopher Fullerton, 2013-07-01 The World of Niagara Wine is a transdisciplinary exploration of the Niagara wine industry. In the first section, contributors explore the history and regulation of wine production as well as its contemporary economic significance. The second section focuses on the entrepreneurship behind and the promotion and marketing of Niagara wines. The third introduces readers to the science of grape growing, wine tasting, and wine production, and the final section examines the social and cultural ramifications of Niagara's increasing reliance on grapes and wine as an economic motor for the region. The original research in this book celebrates and critiques the local wine industry and situates it in a complex web of Old World traditions and New World reliance on technology, science, and taste as well as global processes and local sociocultural reactions. Boehm, Joann Zadrozny, 2024-03-25 This book presents the evolution of the Powerful Geography approach to teaching and learning in the United States and how the approach can be adapted and implemented in other countries. Powerful Geography acknowledges the remarkable diversity that exists in classrooms, the wide-ranging interests of modern students, and the desire of these students to translate dynamic subject matter into useful information and concepts, a process that is consistent with modern educational theory. For Powerful Geography to work in secondary and postsecondary education, teachers and university professors must adapt and teach geography as a critical training where individual students see opportunities to apply geography content, skills, and technology to real-world problems that they care about. This book challenges geography educators at all levels to strengthen their applied curriculum in order to help students prepare for jobs and careers in broad areas such as climate change, migration, environmental protection, natural resources, energy.
