Regional Dynamics In A Decentralized Indonesia:

Regional Dynamics in a Decentralized Indonesia Hal Hill, 2014-05-20 Indonesia is the world's largest archipelagic state. In 2001 it embarked on a big bang decentralization involving a major transfer of administrative, political and financial authority to its districts, now numbering more than 500. Together with the rapid transition from authoritarian to democratic rule in the late 1990s, this initiative has transformed the country's political, social and business life. While national government is the major area of contestation, power has shifted irreversibly away from the centre. How this significantly increased regional autonomy works will have a crucial bearing on the future of the Indonesian nation state. This volume features contributions by over 40 writers with deep expertise on Indonesia. The book provides a timely, comprehensive and analytical assessment of the country's regional development dynamics in the post-decentralization environment. It explores historical, political and development patterns at the regional level, the relationship between decentralization and governance, local level perspectives, migration, cities and connectivity, and the challenges confronting the peripheral regions of Aceh and Papua.

Decentralization of government and forestry in Indonesia Thung, P.H., 2019-06-03 The decentralization program that Indonesia embarked on in 1998 continues to unfold through manifold, sometimes contradictory processes. This working paper presents a concise and up-to-date overview of the aims, dimensions and dynamics of decentralization. Decentralized Governance and Accountability Jonathan A. Rodden, Erik Wibbels, 2019-02-28 At the end of the twentieth century, academics and policymakers welcomed a trend toward fiscal and political decentralization as part of a potential solution for slow economic growth and poor performance by insulated, unaccountable governments. For the last two decades, researchers have been trying to answer a series of vexing questions about the political economy of multi-layered governance. Much of the best recent research on decentralization has come from close collaborations between university researchers and international aid institutions. As the volume and quality of this collaborative research have increased in recent decades, the time has come to review the lessons from this literature and apply them to debates about future programming. In this volume, the contributors place this research in the broader history of engagement between aid institutions and academics, particularly in the area of decentralized governance, and outline the challenges and opportunities to link evidence and policy action. **Rethinking**

Power Relations in Indonesia Michaela Haug, Martin Rössler, Anna-Teresa Grumblied, 2016-07-15 Since colonial rule, the island of Java served as Indonesia's imagined centre and prime example of development, while the Outer Islands were constructed as the state's marginalised periphery. Recent processes of democratisation and regional autonomy, however, have significantly changed the power relations that once produced the marginality of the Outer Islands. This book explores processes of political, economic and cultural transformations in Indonesia, emphasizing their implications for centre-periphery relations from the perspective of the archipelago's margins. Structured along three central themes, the book first provides theoretical contributions to the understanding of marginality in Indonesia. The second part focuses on political transformation

processes and their implications for the Outer Islands The third section investigates the dynamics caused by economic changes on Indonesia's periphery Chapters written by experts in the field offer examples from various regions which demonstrate how power relations between centre and periphery are getting challenged contested and reshaped The book fills a gap in the literature by analysing the implications of the recent transformation processes for the construction of marginality on Indonesia's Outer Islands

Managing Globalization in the Asian Century Hal Hill, 2016-11-17 The global centre of gravity continues to shift to the Asia Pacific the most dynamic region in the world These economies have generally grown faster for longer periods of time than any other major region in world history Their embrace of globalization has been a central feature and driver of their dynamism The management of Asia Pacific economic integration and globalization is crucial not only for the countries themselves but also for the state of the global economy including importantly latecomer developing economies who look to the region for analytical and development policy lessons Twenty eight leading international authorities in the field drawn from nine countries provide a comprehensive examination of the causes consequences and challenges of globalization in a volume that celebrates the distinguished career of Professor Prema Chandra Athukorala Among the major issues examined are the region's distinctive approach to trade liberalization the effects of economic growth on poverty reduction and the labour market the special challenges of by passed regions the role of ideas in influencing policy making the modalities of connecting to global production networks and the importance of remittances in economic development Several country case studies provide in depth analyses of development processes and outcomes These include episodes in economic development the challenges faced by transition economies the macroeconomics of adjusting to slower growth and rising debt in advanced economies and the so called middle income trap phenomenon

Agricultural Development in the World Periphery Vicente Pinilla, Henry Willebald, 2018-02-06 This book brings together analysis on the conditions of agricultural sectors in countries and regions of the world's peripheries from a wide variety of international contributors The contributors to this volume proffer an understanding of the processes of agricultural transformations and their interaction with the overall economies of Africa Asia and Latin America Looking at the nineteenth and twentieth centuries the onset of modern economic growth the book studies the relationship between agriculture and other economic sectors exploring the use of resources land labour capital and the influence of institutional and technological factors in the long run performance of agricultural activities Pinilla and Willebald challenge the notion that agriculture played a negligible role in promoting economic development in the nineteenth and twentieth centuries when the impulse towards industrialization in the developing world was more impactful

Populism and Patronage Paul D. Kenny, 2017-09-22 Populist rule is bad for democracy yet in country after country populists are being voted into office Populism and Patronage shows that the populists such as Indira Gandhi and Narendra Modi win elections when the institutionalized ties between non populist parties and voters decay Yet the explanations for this decay differ across different types of party system Populism

and Patronage focuses on the particular vulnerability of patronage based party systems to populism Patronage based systems are ones in which parties depend on the distribution of patronage through a network of brokers to mobilize voters Drawing on principal agent theory and social network theory this book argues that an increase in broker autonomy weakens the ties between patronage parties and voters making latter available for direct mobilization by populists Decentralization is thus a major factor behind populist success in patronage democracies The volume argues that populists exploit the breakdown in national patronage networks by connecting directly with the people through the media and mass rallies avoiding or minimizing the use of deeply institutionalized party structures This book not only reinterprets the recurrent appeal of populism in India but also offers a more general theory of populist electoral support that is tested using qualitative and quantitative data on cases from across Asia and around the world including Indonesia Japan Venezuela and Peru *Time to ACT* Mark Roberts, Frederico Gil Sander, Sailesh Tiwari, 2019-04-20 Indonesia has urbanized rapidly since its independence in 1945 profoundly changing its economic geography and giving rise to a diverse array of urban places These places range from the bustling metropolis of Jakarta to rapidly emerging urban centers in hitherto largely rural parts of the country Although urbanization has produced considerable benefits for many Indonesians its potential has only been partially realized Time to ACT Realizing Indonesia's Urban Potential explores the extent to which urbanization in Indonesia has delivered in terms of prosperity inclusiveness and livability The report takes a broad view of urbanization's performance in these three key areas covering both the monetary and nonmonetary aspects of welfare It analyzes the fundamental reforms that can help the country to more fully achieve widespread and sustainable benefits and it introduces a new policy framework the ACT framework to guide policy making This framework emphasizes the three policy principles of Augment Connect and Target Augment the provision and quality of infrastructure and basic services across urban and rural locations Connect places and people to jobs and opportunities and services Target lagging areas and marginalized groups through well designed place based policies as well as thoughtful urban planning and design Using this framework the report provides policy recommendations differentiated by four types of place that differ in both their economic characteristics and the challenges that they face multidistrict metro areas single district metro areas nonmetro urban areas and nonmetro rural areas In addition to its eight chapters Time to ACT Realizing Indonesia's Urban Potential includes four spotlights on strengthening the disaster resilience of Indonesian cities the nexus between urbanization and human capital the invisible crisis of wastewater management and the potential for smart cities in Indonesia If Indonesia continues to urbanize in line with global historical standards more than 70 percent of its population will be living in towns and cities by the time the country celebrates the centenary of its independence in 2045 Accordingly how Indonesia manages this continued expansion of its urban population and the mounting congestion forces that expansion brings will do much to determine whether the country reaches the upper rungs of the global ladder of prosperity inclusiveness and livability **Indonesia** Jamie S. Element argues that after twenty years of democratization Indonesia has performed admirably This is especially so when the country's accomplishments are placed in comparative perspective However as we analytically focus more closely to inspect Indonesia's political regime political economy and how identity based mobilizations have emerged it is clear that Indonesia still has many challenges to overcome some so pressing that they could potentially erode or reverse many of the democratic gains the country has achieved since its former authoritarian ruler Soeharto was forced to resign in 1998 *Crime and Punishment in Indonesia* Tim Lindsey, Helen Pausacker, 2020-12-14 Indonesia's criminal law system faces major challenges Despite the country's transition to democracy both the Criminal Code and the Criminal Procedure Code are badly out of date the former only superficially changed since colonial times and the latter remaining as it was under Soeharto's authoritarian New Order regime Law enforcement officers and judges are widely seen as corrupt or incompetent and new laws including new Islamic laws passed at the regional level often contradict the Criminal Code and national statutes including human rights laws This book based on extensive original research by leading scholars in the field provides an overall assessment of the state of criminal law law enforcement and penal policy in Indonesia considers in depth a wide range of specific areas of criminal law and discusses recent efforts at reform and their prospects for success Missing links in the forest-migration nexus Thung, P.H., Juniwati, K.S., 2018-03-16 This paper provides an overview of the current state of knowledge about migration and its relation to forests in Indonesia An evaluation of current patterns and trends of migration finds that while mobility is increasing nationally and internationally Balancing Individualism and Collectivism Janet McIntyre-Mills, Norma Romm, Yvonne Corcoran-Nantes, 2017-10-03 This book addresses the social and environmental justice challenge to live sustainably and well It considers the consequences of our social economic and environmental policy and governance decisions for this generation and the next The book tests out ways to improve representation accountability and regeneration It addresses the need to take into account the ethical implications of policy and governance decisions in the short medium and long term based on testing out the implications for self other and the environment This book recognizes the negative impact that humans have had on the Earth's ecosystem and recommends a less anthropocentric way of looking at policies and governance The chapters discuss the geologic impact that people have had on the globe both positive and negative and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era Based on these observations the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience and to conduct an egalitarian lifestyle These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority the growth in unsustainable food choices and of displaced people and the need for a new sense of relationship with nature and other animals among other issues The chapters included in *Balancing Individualism and Collectivism* Social and Environmental Justice encourage readers to challenge the sustainability agenda of the anthropocentric life Proposed solutions to these unsustainable actions include

structuralized interventions and volunteerism through encouragement and education with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance

The Political Economy of Redistribution in Indonesia Gerrit J. Gonschorek, 2023-12-13 This book analyses how different institutional intergovernmental transfer designs influence patronage and favoritism in public fund allocations in Indonesia Presenting original research and investigating existing theories on the determinants of public fund allocations the book uses Indonesia as a case study Indonesia often claimed to be characterized by money politics provides an ideal setting for this analysis The countries decentralized fiscal system consists of various institutional intergovernmental transfer designs allocating public funds to a large variety of districts to finance public service provision The author exploits those distinctive differences between various institutional intergovernmental transfer designs and investigates their influence on the prevalence of favoritism and patronage in public funds allocations while holding the political system the observation period and the government officials involved constant A valuable contribution to the literature on the political economy of redistribution this book will be of interest to academics working on economics and political science particularly in public finance and development economics but also in development studies or Southeast Asian studies

Indonesia Edimon Ginting, Christopher Manning, Kiyoshi Taniguchi, 2018-02-01 The book focuses on Indonesia s most pressing labor market challenges and associated policy options to achieve higher and more inclusive economic growth The challenges consist of creating jobs for and the skills in a youthful and increasingly better educated workforce and raising the productivity of less educated workers to meet the demands of the digital age The book deals with a range of interrelated topics the changing supply and demand for labor in relation to the shift of workers out of agriculture urbanization and the growth of megacities raising the quality of schooling for new jobs in the digital economy and labor market policies to improve both labor standards and productivity
