Poetic Environmental Activism and Education Amanda Fulford, Victoria Jamieson, 2025-03-25 This book brings together the works of the nineteenth and twentieth century writers Henry David Thoreau and Anna Shepherd Finding in their work a common approach of poetic forms of writing that enact kinds of environmental activism the book re positions them in the context of current environmental crises by offering an original resource for supporting poetic environmental activism in educational contexts Bringing together scholarship from North America and Europe the book draws on Thoreau and Shepherd s literary and philosophical sources to support a conceptual understanding of education s role in how we think about understand and tackle the climate crisis Chapters trace the idea of poetic environmental activism in Thoreau and Shepherd applying literary and environmental thought to educational practice and contexts The book is timely in taking a scholarly approach that explores educational engagements with climate change and focuses on education for environmental sustainability Advocating for engagement with the climate emergency through the lens of poetic environmental activism this volume will appeal to postgraduate students researchers and scholars involved with sustainability education philosophy of education poetic inquiry and literary theory for environmental action      *Metal Oxide-Based Heterostructures* Naveen Kumar, Bernabé Marí Soucase, 2022-11-13 Metal Oxide Based Heterostructures Fabrication and Applications provides information on synthesis strategies structural and hierarchical features morphological characteristics of metal oxide based heterostructures and their diverse applications This book begins with an introduction to the various multidimensional heterostructures synthesis aspects and techniques used to control the formation of heterostructures Then the impact of synthesis routes on the formation of mixed metal oxide heterostructures and their properties are analyzed The effect of nonmetal doping metal doping and composites of metal oxide heterostructures on the properties of heterostructures is also addressed and that also includes opportunities for optimization of the material s performance for specific applications Special attention is given to the surface characteristics of the metal oxide heterostructures and their impact on the material s performance and the applications of metal oxide heterostructures in various fields such as environmental remediation sensing organic catalysis photovoltaics light emitting materials and hydrogen production Introduces key principles for metal oxide heterostructures their properties key characteristics and synthesis routes Emphasizes the relationship between synthesis strategies and material performance including optimization strategies such as tailoring the material s surface characteristics or structure Discusses metal oxide heterostructures and their application in lighting and displays energy environment and sensing      **Recent Advances in Application of Synthetic Biology for Production of Bioactive Compounds** Luan Luong Chu, Jae Kyung Sohng, Dipesh Dhakal, Jingwen Zhou, 2022-02-09      Application of thermo-optic beam control in GaAs-based edge emitters Philipp Hildenstein, 2025-06-04 Edge emitting GaAs based diode lasers and amplifiers are essential for high power coherent light sources 620 1180 nm in metrology and materials processing However

photonic integration on silicon or glass offers higher on chip functional density This thesis enhances GaAs emitters by integrating adaptive thermo optical elements enabling functions previously requiring other platforms or complex optics The thermo optic effect refractive index change via temperature provides large index modulation with moderate power Part I studies light propagation under localized heating Metallized heater stripes are processed on a passive GaAs slab waveguide no quantum wells to create thermal waveguides Straight stripes demonstrate optical waveguiding while bent stripes probe bend losses versus offset and heat input The results are supported by multi physics simulations Part II applies these results to active GaAs structures emitting at 1120 nm with top side heaters First beam steering achieves 14 horizontal deflection with near diffraction limited quality and 0.6 kHz modulation promising for LIDAR and scanning Second adaptive thermal lenses in tapered edge amplifiers compensate intrinsic astigmatism across the operating range preserving beam quality and power beneficial for fiber coupling and nonlinear pumping These findings show that precise thermal control enables diverse functions in GaAs edge emitters establishing design principles for future advanced GaAs based lasers and amplifiers

**Analytics and Intuition in the Process of Selecting Talent** Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted

and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners Pathway Design for Industrial

**Reimagining Israel and Palestine in Contemporary British and German Culture** Isabelle Hesse, 2024-03-05  
Isabelle Hesse identifies an important relational turn in British and German literature TV drama and film published and produced since the First Palestinian Intifada 1987 1993 This turn manifests itself on two levels one in representing Israeli and Palestinian histories and narratives as connected rather than separate and two by emphasising the links between the current situation in Israel and the Occupied Palestinian Territories and the roles that the United Kingdom and Germany have played historically and continue to play in the region This relational turn constitutes a significant shift in representations of Israel and Palestine in British and German culture as these depictions move beyond an engagement with the Holocaust and Jewish suffering at the expense of Palestinian suffering and indicate a willingness to represent and acknowledge British and German involvement in Israeli and Palestinian politics This book offers new ways of thinking about how Israel and Palestine are imagined and reimagined as topics of cultural and political interest in two countries that have had complicated histories with both Israel and Palestine histories which are marked by each country s memories of the Holocaust and colonialism

*The Monetization of Technical Data* Daniel Trauth, Thomas Bergs, Wolfgang Prinz, 2023-01-01 The monetization of data is a very young topic for which there are only very few case studies There is a lack of strategy or concept that shows decision makers the way into the monetization of data especially those who have discovered or are threatened by the digital transformation or Industry 4 0 Because machine data is usually unstructured and not usable without domain knowledge metadata the monetization of machine data has an as yet unquantifiable potential In order to make this potential tangible this work describes not only contributions from science but also practical examples from industry Based on different examples from various industries the reader can already become part of a future data economy today Values and benefits are described in detail The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Han Zhang, Yanmei Tie, Cornelia Brendle, 2022-02-01 **Regulating with RNA in Bacteria and Archaea** Gisela Storz, Kai Papenfort, 2020-07-10 Revealing the many roles of RNA in regulating gene expression For decades after the

discoveries of messenger RNA transfer RNA and ribosomal RNA it was largely assumed that the role of RNA in the cell was limited to shuttling the genomic message chaperoning amino acids and toiling in the ribosomes Eventually hints that RNA molecules might have regulatory roles began to appear With the advent of genomics and bioinformatics it became evident that numerous other RNA forms exist and have specific functions including small RNAs sRNA RNA thermometers and riboswitches to regulate core metabolic pathways bacterial pathogenesis iron homeostasis quorum sensing and biofilm formation All of these functions and more are presented in *Regulating with RNA in Bacteria and Archaea* written by RNA biologists from around the globe Divided into eight sections RNases and Helicases Cis Acting RNAs Cis Encoded Base Pairing RNAs Trans Encoded Base Pairing RNAs Protein Titration and Scaffolding General Considerations Emerging Topics and Resources this book serves as an excellent resource for established RNA biologists and for the many scientists who are studying regulated cellular systems It is no longer a fair assumption that gene expression regulation is the provenance of proteins only or that control is exerted primarily at the level of transcription This book makes clear that regulatory RNAs are key partners along with proteins in controlling the complex interactions and pathways found within prokaryotes **EU**
