The Violinist's Thumb Sam Kean, 2012-07-17 From New York Times bestselling author Sam Kean comes incredible stories of science history language and music as told by our own DNA In *The Disappearing Spoon* bestselling author Sam Kean unlocked the mysteries of the periodic table In *The Violinist's Thumb* he explores the wonders of the magical building block of life DNA There are genes to explain crazy cat ladies why other people have no fingerprints and why some people survive nuclear bombs Genes illuminate everything from JFK's bronze skin it wasn't a tan to Einstein's genius They prove that Neanderthals and humans bred thousands of years more recently than any of us would feel comfortable thinking They can even allow some people because of the exceptional flexibility of their thumbs and fingers to become truly singular violinists Kean's vibrant storytelling once again makes science entertaining explaining human history and whimsy while showing how DNA will influence our species future

Blanks, Print, Space, and Void in English Renaissance Literature Jonathan Sawday, 2023 This book is an inquiry into blank or empty spaces in primarily English printed books in the period c 1500 c 1700 as well as in Renaissance culture more generally The book concentrates on the substrate the background of any printed work which is often held to be empty or blank space These spaces are also considered as gaps where text or images are constructed as missing lost withheld or perhaps never devised in the first place The topics discussed include space and silence emptiness and absence the vacuum race and racial identity blackness and whiteness together with lightness darkness and sightlessness cartography and emptiness the effect of typography on reading practices the social spaces of the page gendered surfaces hierarchies of information books of memory pages constructed as waste or vacant blank forms and bureaucracy political and devotional spaces censorship endings fragments terminations and mortality The book pays close attention to the writings of many of the familiar figures in English Renaissance literary culture Sidney Shakespeare Donne Jonson and Milton But the book also discusses the work of numerous women writers from the period including Aphra Behn Ann Bradstreet Margaret Cavendish Lady Jane Gray Lucy Hutchinson melia Lanyer Arbella Stuart Isabella Whitney and Lady Mary Wroth as well as introducing readers to many lesser known figures and writings of the period

numbers abbreviations and computer error messages 2 The castle is made up of different materials in different areas The coordinates of an element determine nearly everything scientifically interesting about it The noble gases are a set of elements in column eighteen at the far right hand side of the table 3 Helium is an example of an element that cannot be broken down or altered by normal chemical means It took scientists 2 200 years to realize what elements really are because most are too changeable 4 The repose of the noble gases is rare The most energetic and reactive gases are found in the halogen column to the west and they form an alliance of interests with the alkali metals
