economics Business Management Corporate Governance grade 1 3 Zeppelin University Friedrichshafen language English abstract The concept of the joint venture was developed in the United States First we need to make a distinction between purely contractual non equity joint ventures on the one hand and equity or corporate joint ventures on the other The regular form of joint venture is a company that is founded out of equity provided from two other entities This venture is similar to a business partnership but limited to a specific project or purpose The equity joint venture manifests the founding firms willingness to cooperate by providing each a certain percentage of the common capital stock as illustrated in the graphic below in this case with each partner providing half of the capital stock There are countless ways to build up an equity joint venture with each partner providing only a certain percentage of the common capital stock e g 70 30% 90 10% 51 49% and so forth The firms gain control over the founded joint venture and share revenues expenses and assets in equal proportion to their respective contributions to the venture's registered capital Differing arrangements are possible Over the last decade we were able to witness rapidly growing companies some of them seeking for partnerships to take advantage of positive synergy effects to gain in size or to enter new foreign markets The topic of this essay should be why firms seek to venture what the benefits of venturing are and why some firms fail after the venture what are the downsides of this concept **Modern**
