Physical Science Memorandum Grade 1 September 2013:

Federal Register, 2013-09 **Engineering Vulnerability** Sarah E. Vaughn, 2022-02-07 In *Engineering Vulnerability* Sarah E. Vaughn examines climate adaptation against the backdrop of ongoing processes of settler colonialism and the global climate change initiatives that seek to intervene in the lives of the world's most vulnerable. Her case study is Guyana in the aftermath of the 2005 catastrophic flooding that ravaged the country's Atlantic coastal plain. The country's ensuing engineering projects reveal the contingencies of climate adaptation and the capacity of flooding to shape Guyanese expectations about racial inequality. Analyzing the coproduction of race and vulnerability, Vaughn details why climate adaptation has implications for how we understand the past and the continued human settlement of a place. Such understandings become particularly apparent not only through experts' and ordinary citizens' disputes over resources but in their attention to the ethical practice of technoscience over time. Approaching climate adaptation this way, Vaughn exposes the generative openings as well as gaps in racial thinking for theorizing climate action, environmental justice, and more broadly, future life on a warming planet. Duke University Press Scholars of Color First Book Award recipient. *Peace in the Mountains* Tom Weyant, 2023-08-18 *Peace in the Mountains* analyzes student activism at the University of Pittsburgh, Ohio University, and West Virginia University during the Vietnam War era. Drawing from a wide variety of sources, including memoirs, periodicals, archival manuscript collections, and college newspapers such as *The Pitt News*, author Thomas Weyant tracks the dynamics of a student-led campus response to the war in real time and outside the purview of the national media. Along the way, he musters evidence for an emerging social and political conscience among the student bodies of northern Appalachia, citing politics on campus, visions of patriotism and dissent, campus citizenship, antiwar activism, and draft resistance. Campus issues and civil rights as major sites of contention and exploration. Through this regional chronicle of student activism during the Vietnam War era, Weyant holds to one reoccurring and unifying theme: citizenship. His account shows that political activism and civic engagement were by no means reserved to students at elite colleges; on the contrary, Appalachian youth were giving voice to the most vexing questions of local and national responsibility, student and citizen identity, and the role of the university in civil society. Rich in primary source material from student op-eds to administrative documents, *Peace in the Mountains* draws a new map of student activism in the 1960s and early 1970s. Weyant's study is a thoughtful and engaging addition to both Appalachian studies and the historiography of the Vietnam War era and is sure to appeal not only to specialists, Appalachian scholars, political historians, political scientists, and sociologists but to college students and general readers as well. *Bodies, Technologies and Methods* Phil Jones, 2020-04-14 This book examines how different technologies can be used to enhance research methods in the social sciences and humanities. The boundary between the body and the digital has become increasingly blurred in recent years due to the rise of technologies that capture and reshape our embodied selves. New technologies all too often reflect the attitudes of the privileged white men who dominate

the tech sector This book thus in part considers how critical researchers can employ new technologies while challenging some of the problematic assumptions that underpin their design It also includes a series of case studies that examine the dynamic use of different techniques to explore key questions around the intersection of embodiment and the digital With a playful experimental approach to conducting research today this book offers new cutting edge methods that respond to the potential of different technologies It will be invaluable reading for undergraduate and post graduate students of social sciences and humanities to explore ways in which this approach can bring new insights to a range of interdisciplinary research questions Congressional Record United States.
