**Bioverse** William B. Miller, 2022-10-15 For as long as humans have been on Earth we have looked up to the stars for clues to our own existence Medical doctor and evolutionary biologist William B Miller Jr suggests that we may find more meaningful solutions at the end of a microscope rather than a telescope Using powerful analogies and exacting science Bioverse explores the wonders of the perpetual partnership between our personal cells and the microbial world resulting in an entirely new view of our living planet To understand life in all its varieties we must undertake to understand our cells While the partnership between our cells and our microbes has largely been thought of as that of host and guest Miller reveals the true partnership under which both our microbial fraction and our own personal cells conduct a life long dialogue redefining our traditional conceptions of intelligence and problem solving This radical new approach explains exactly how our human choices are centered within the same cellular rules that enable our cells to seamlessly sustain our lives We are now entering the Era of the Cell a time in history during which medical and scientific innovations have spurred growth far beyond ever imagined by our ancestors For the first time we are not only building machines to enhance our lives but engineering living organisms to assist our futures From the biological origins of evolution to the invention of the compound microscope by a Dutch lens maker in the 17th century to new research that reveals surprising links between our microbiome and our moods and behavior and surprising stories of the cellular world from the deepest oceans wildest jungles and outer reaches of our solar system Miller introduces readers to a greater understanding of our impact on the planet and the world's reciprocal impact on each of us By exploring the extent of our deeply integrated cellular world Bioverse provides profound insights about ourselves our health and well being our social systems and our permanent relationship to the planet
