Mountains: Physical, Human-Environmental, and Sociocultural Dynamics Mark A. Fonstad, 2018-12-07 Mountains have captured the interests and passions of people for thousands of years Today millions of people live within mountain regions and mountain regions are often areas of accelerated environmental change This edited volume highlights new understanding of mountain environments and mountain peoples around the world The understanding of mountain environments and peoples has been a focus of individual researchers for centuries more recently the interest in mountain regions among researchers has been growing rapidly The articles contained within are from a wide spectrum of researchers from different parts of the world who address physical political theoretical social empirical environmental methodological and economic issues focused on the geography of mountains and their inhabitants The articles in this special issue are organized into three themed sections with very loose boundaries between themes 1 physical dynamics of mountain environments 2 coupled human physical dynamics and 3 sociocultural dynamics in mountain regions This book was first published as a special issue of the Annals of the American Association of Geographers *The Athenæum* ,1883 Exploring the Geology of the Inland Northwest Reed S. Lewis, Keegan L. Schmidt, 2016-05-05 This volume is composed of guides to the lavas of the Columbia River basalts megaflood landscapes of the Channeled Scablands Mesozoic accreted terranes metamorphic Precambrian Belt and pre Belt rocks and other features of this tectonically active region **Selected Water Resources Abstracts** ,1987 **Tectonics, Sedimentary Basins, and Provenance: A Celebration of the Career of William R. Dickinson** Raymond V. Ingersoll, Timothy F. Lawton, Stephan A. Graham, 2017-12-28 Through a remarkable combination of intellect self confidence engaging humility and prodigious output of published work William R Dickinson influenced and challenged three generations of sedimentary geologists igneous petrologists tectonicists sandstone petrologists archaeologists and other geoscientists A key figure in the plate tectonic revolution of the 1960s and 1970s he explained how the distribution of sediments on Earth s surface could be traced to tectonic processes and is widely recognized as a founder of modern sedimentary basin analysis This volume consists of 31 chapters related to Dickinson s research interests many of the authors are his former students their students and their students students demonstrating his continuing profound influence The papers in this volume are an impressive tribute to the depth and breadth of Bill Dickinson s contributions to the geosciences **Strong Winds and Widow Makers** Steven C. Beda, 2022-12-13 Winner of the 2022 Philip Taft Labor History Book Prize Often cast as villains in the Northwest s environmental battles timber workers in fact have a connection to the forest that goes far beyond jobs and economic issues Steven C Beda explores the complex true story of how and why timber working communities have concerned themselves with the health and future of the woods surrounding them Life experiences like hunting fishing foraging and hiking imbued timber country with meanings and values that nurtured a deep sense of place in workers their families and their communities This sense of place in turn shaped ideas about protection that sometimes clashed with the views of

environmentalists or the desires of employers. Bede's sympathetic in-depth look at the human beings whose lives are embedded in the woods helps us understand that timber communities fought not just to protect their livelihood but because they saw the forest as a vital part of themselves.

Bearing Yhwh's Name at Sinai Carmen Joy Imes, 2023-06-21 The Name Command NC is usually interpreted as a prohibition against speaking Yhwh's name in a particular context: false oaths, wrongful pronunciation, irreverent worship, magical practices, cursing, false teaching, and the like. However, the NC lacks the contextual specification needed to support the command as speech-related. Taking seriously the narrative context at Sinai and the closest lexical parallels, a different picture emerges: one animated by concrete rituals and their associated metaphorical concepts. The unique phrase *ns shm* is one of several expressions arising from the conceptual metaphor of election as branding that finds analogies in high priest regalia as well as in various ways of claiming ownership in the Ancient Near East, such as inscribed monuments, the use of seals, and the branding of slaves. The NC presupposes that Yhwh has claimed Israel by placing Yhwh's own name on her. In this light, the first two commands of the Decalogue reinforce the two sides of the covenant declaration: "I will be your God; you will be my people." The first expresses the demand for exclusive worship, and the second calls for proper representation. As a consequence, the NC invites a richer exploration of what it means to be a people in covenant with Yhwh: a people bearing his name among the nations. It also points to what is at stake when Israel carries that name in vain. The image of bearing Yhwh's name offers a rich source for theological and ethical reflection that cannot be conveyed nonmetaphorically without distortion or loss of meaning.

Visualising Skyscapes Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere, that great dome of the sky which governs light and darkness, critical to life itself yet its influence is often neglected in the archaeological narrative. *Visualising Skyscapes* captures a growing interest in the emerging field of skyscape archaeology. This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research. Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam, its contents have a wide-reaching relevance for the fields of archaeology, anthropology, ethnography, archaeoastronomy, astronomy, heritage, and cultural studies. The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world. *Visualising Skyscapes* captures the growing interest in the multidisciplinary study of skyscapes and will be of interest to academics, students, and the general public as well as having international appeal. It is topical, timely, and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation. The contributions showcase the work of distinguished academics in the field, and the chapters are all enhanced by numerous photographs and images.

Nuclear Power David Elliott, 2017-05-02 This book looks at the early history of nuclear power, at what happened next, and at its longer-term prospects. The main question is: can nuclear power overcome the problems that have emerged? It was once touted as the

ultimate energy source freeing mankind from reliance on dirty expensive fossil energy Sixty years on nuclear only supplies around 11.5% of global energy and is being challenged by cheaper energy options While the costs of renewable sources like wind and solar are falling rapidly nuclear costs have remained stubbornly high Its development has also been slowed by a range of other problems including a spate of major accidents security concerns and the as yet unresolved issue of what to do with the wastes that it produces In response a new generation of nuclear reactors is being developed many of them actually revised versions of the ideas first looked at in the earlier phase Will this new generation of reactors bring nuclear energy to the forefront of energy production in the future
