Red Scarlet Operation Guide:

RED Noah Kadner, 2010-04-07 With the release of the RED ONE™ digital cinema camera the possibility of recording stunning cinematic quality images with an affordable camera became a reality. Now that the industry has embraced the nascent technology and added new tools and workflows, filmmakers from independents on up are leading the charge on establishing new rules. Here to guide newcomers and RED veterans alike, popular trainer and filmmaker Noah Kadner picks up where the manual leaves off. You've got the basic operations down and now you'll learn how to use the camera in a production environment and discover the various options in post. Using a clear, objective approach, he offers best practice advice on utilizing RED's proprietary tools, explains the workflows for Final Cut Studio, Avid, and Premiere Pro, and gives work-around solutions where needed. Well-known filmmakers and industry leaders share their own bleeding-edge production methodologies throughout, offering a rare view into this exciting new world of filmmaking. Here are just a few things you'll learn to do: Build a RED package that fits your budget; Set up for sound recording and learn which audio tools to use; Achieve the optimal exposure using RED's onboard tools and external gear; Edit your footage with step-by-step instructions for Avid, Final Cut Pro, and Premiere Pro; Work color correction into your HD film or Web projects; Prep your project for output and archive your footage. Learn from pros such as Rodney Charters, ASC, DP 24; Simon Duggan, ACS, DP; Knowing Albert, Hughes Director; The Book of Eli; and many others using RED. Stay up to date and download additional resources at the companion Web site at www.peachpit.com/red. If you want to dive in and start using the RED, look no further. This book is the next best thing to having a top-notch production crew with RED experts working by your side. Arthur Albert, Director of Photography, ER. An essential guide loaded with knowledge, I recommend it as the first purchase for any filmmaker who is thinking about owning or currently owns the RED. Rodney Charters, ASC, Director of Photography 24. If you're planning to shoot with the RED camera, this is the book to get. Rob Cohen, Director, The Fast and the Furious. Noah Kadner takes the best practices of using the RED camera and shares them with the rest of us in this indispensable guide. Simon Duggan, ACS, Director of Photography, Live Free or Die Hard. Knowing: Written in an easy-to-follow style yet thorough in covering everything from production to postproduction to making money from your investment, this is a book that should be on every filmmaker's desk and in their kit bag. Norman Hollyn, Film Editor, Instructor, and author of The Lean Forward Moment. If you want to see how the pros are using the RED camera, you need this book. Nancy Schreiber, ASC, Cinematographer, Every Day.

The Light and Smith Manual Sol Felyt Light, 2007. An immensely useful manual with many attractive features: comprehensive and lucid keys, precise diagrams, annotated checklists, and up-to-date references. There is no doubt that it should be seen as an example of the type of manual which is so badly needed in the study of the fauna of many shores around the world. *Journal of Animal Ecology*. Congratulations to the editors, contributors, and publisher for a job well done. The third

edition has been rewritten corrected and enlarged so that while retaining the basic organization of the earlier ones it is more useful informative and up to date The meticulous scholarship of Smith and Carlton is just what the revision needed Systematic Zoology This revision should serve for many years It is therefore particularly commendable that the editing has been meticulous perhaps flawless thanks are due to the many contributors for a job well done The Quarterly Review of Biology As the Pacific Coast intertidal zone undergoes increasingly profound changes knowing the sentinel invertebrates can foretell the future of the sea and hence of our species Jim Carlton s hefty new update of The Light Smith Manual the comprehensive compendium of who s who between the tides is the best and quickest way to do so Elliot A Norse President Marine Conservation Biology Institute This much anticipated modernization of Light s Manual is an astonishing accomplishment blending state of the art taxonomy with profusely illustrated and user friendly keys to who s whom on marine shores from its stated boundaries of mid California through Oregon and clearly much further north It s also an informative well referenced read Marine biologists should not leave home without it Robert Paine Professor Emeritus of Biology University of Washington At this time of environmental change and loss of biodiversity species identification has never been more important The fourth edition of Light and Smith is more than just a field guide it is a masterwork of research and description with a strong focus on morphological detail No other book has such a broad scope newly expanded to include even the most obscure taxa The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever As taxonomists become extinct there are fewer students to receive the vast body of knowledge accumulated by generations of careful study I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work It will have a place of honor in all marine labs Paul K Dayton Scripps Institution of Oceanography
