RefComp 134-S Semi-hermetic Screw Compressor

RefComp 134-S series compressors with oil-injection design are specially developed for R404A. The semi-hermetic compressors with displacement ranging from 75m³/h to 305m³/h, and rated power ranging from 175 to 1300kW. This compressor series features the built-in oil separator, automatic lubrication, low noise, high efficiency, multiple protection and easy installation, catering to different manufacturers' demands to produce ultra-low-temperature refrigeration systems, medium refrigeration and food pump units.

Compressor body

- Optimized design of suction and exhaust, low-pressure differential and sufficient cooling for motor, stronger through-hole structure, reduction of air resistance, less discharge temperature, lower energy consumption.
- Compact design and integrated structure with integrated filter, which reduces temperature increase.

Motor

- Motor winding is 100% class B, with small starting current and low energy consumption in operation.
- Optimized winding structure and refrigerant oil film management, effective cooling to ensure sufficient motor efficiency, especially customized materials and coils for design to improve motor efficiency.
- Advanced motor design with thermal efficiency control that can stop the refrigerant gas flow when the motor starts to overheat to protect the motor.

Motor protection

- Motor winding is 100% class B, with small start current and low energy consumption in operation.
- Advanced winding structure and refrigerant oil film management, effective cooling to ensure sufficient motor efficiency, especially customized materials and coils for design to improve motor efficiency.
- Advanced motor design with thermal efficiency control that can stop the refrigerant gas flow when the motor starts to overheat to protect the motor.

Sealing

- Motor winding is 100% class B, with small start current and low energy consumption in operation.
- Advanced winding structure and refrigerant oil film management, effective cooling to ensure sufficient motor efficiency, especially customized materials and coils for design to improve motor efficiency.

Discharge oil separator

- A built-in oil separator, designed in a unique design, three-stage separation, effective oil removal, with oil separating efficiency up to 99.9%.
- An advanced structure reduces the size of the compressor.
